Dear Harold,

Haven't had time to write back to you or look over the material that you sent because we've been busy job-looking. Spent last week in Kenosha Wisconsin

and Allentown, Pa. and it appears as tho we're going to move to Allentown in a couple weeks. We're going down the day after tomorrow to look for an apartment.

The radio station there has offered me a job as a newsman, primarily a street man -- in addition they're probably going to give me an all night talk show once a week. It's a lot of work for not too much money, but I think that after a year of that I'll be ready to swing up to something much better.

I presume you've seen the article in the July Atlantic Monthly talking about LBJ suspecting a plot to kill Kennedy. I had a newspaper article that appeared to be a plant debunking it, but I've lost the article -- if I find it I'll make a copy and send it to you. Basically what it ~~w~~ said was somebody who'd been in LBJ's administration said Janos wasn't close enough to him to know what he thought about the issue, and that if he had thought it he would've talked about it to more people. I think the person they were quoting was Ramsey Clark.

You asked me what my source was on Nixon voting the same as Marcantonio -- it was the article that I got the rest of it from -- but my things are right now in such a state of disarray that I can't find the article -- I'll probably locate it as I'm packing, so I'll let you know then.

Guess that's all for now. Glad to hear things are looking good for a Watergate book. By the way -- have you heard that Sherman Skolnik has been going around charging that the plane Mrs. Hunt was in was purposefully sabotaged because large numbers of people on that particular plane had special knowledge of the Watergate? Interesting ~~n~~ to note that Skolnik's still walking around loose.

Russ
