

FM Turner transcript end CD7:518. It seems like he and Belin both made corrections. I take it he is here referring to the car behind the P.O., but because there also seems to have been a freight stopped near the Trade Mart from what I've been told, if you have contrary info, I'd be interested. Interesting that the on-the-ball de Brueys does not include all present at the search, like Johnston, the JP.
