Methinks the voice I couldn't hear this morning was yours. There ere few people in SF who would know the name of the CDM - and I'M glad ou do because I couldn't recall it. The connection was very clar but the volume was very low. The poor quality of the phone service, which has been only to SF, is what has kept Harv from using more of me.

BUT, when I have a new book out that no one has heard about, WHY didn't you ask me about that?

When he gets back from vacation, Harv will do a show pertly on suppression; partly on that.

I'm going to NYC Tuesday and I'll know more than about the pub date of Oswald in How Orleans. The proofs are due next week. Parallex is doing an original reprint. My agreement with them was verbal until a month ago and it did not specifically include the entire book. It did include the entire text of the book. So, 4 have a more than 300-page appendix of documents like those in FW and cannot afford to bring out a private printing in competition with a book that all sell for about \$1.25. Here is where my continuing financial problems give trouble, for they should see the light of day. I wish I had some backstopping. Here is something that is of great value and importence to all the growing movem nts, especially ly peace and black power and things like that, and they know nothing of it and apparently care less. But what I have documented for them they should make an effort to learn. I have no way of telling them that I haven't tried.

If your committee that said it would pay my fare last winter could scretch up that money, I would use it in Aeroxing cooles that I could ropyright. I think I could get someone with the large Xerox to let me use it at his cost. I have learned how to Merox on both sides with that machine. Please try. I cannot do deeper in hock because I have to save that debt capacity or the next book, which I en working on.

My letter campaign has yielded a slight and perhaps meaningless result, as you will see. UPI has suggested I sned them 1000 words. I'll answer that letter later today and send copies. I'm doing a kind of enswer to the CBS series and have started one on AP that 1've laid saide. I amy do a brochure on this later. If you have any suggestions, please make them

I wish there were a lawyer here who would take these cases to the FCC for me. If you think you understand what I am up to, please ask Trucheft if he knows a Washington lawyer who might, without fee, on the principle. I think he'll understand the benefits to a lot of things he believes in.

I'm going to have to se a lawyer about Dell in NYW, on their not performing under the contract and I do not yet have the accounting of my seles due in April. They elso owe mo pidiling laittle sums. The question in my mind is: pressure or their normal athics.

Getting into our new place means almost as much as getting out of our subterreneen garret. I'm going there this c.m. to meat with the men who are to dix up the kitchen, the biggest job to be done. When we move we'll have have a minerature Walden -and better phone service - and better working conditions. So, though it takes time, especially to get, any work done, we look forward to it. That Andrews tope is something, isn t it? ts . Best, Hal
