Report on Television

widened to perform the tracheotomy.'

Mr. Cohen said the autopsy surgeons later that day found a back wound and several clues as to the bullet's path—"a bruise to the top of the lung, a pattern of contusion which was five centimeters in width." After conferring with the Dallas doctors, he said, they "concluded that this bullet had exited from the throat.'

A conflicting Federal Bureau of Investigation report, Mr. Cohen asserted, was based on the first incomplete findings during

the autopsy.

Mr. Weisberg said that "the doctors testified that these bruises could have been caused

by the tracheotomy."

Mr. Bishop said "the ballistics tests go right back to the same rifle.

But Mr. Lane argued that the from the Depository behind it. stretcher in the hospital was He said these included 17 practically "pure, pristine." He Dallas deputy sheriffs, a Dallas said a test bullet from the police officer, eight railroad em-weapon, fired through a goat ployes and some Depository carcass, shattered the goat's executives.
