Dear Barry.

TO THE PERSON OF THE PERSON OF

The carbon of this letter is for Paul Valentine, to explain my call to him after he had left the office, about lumchtime. Paul had phoned me earlier about one Vincent Homard, whose name was not familiar to me.

After Paul and I spoke I remembered two things in my files that I can't now evaluate in terms of value to you, both relating to Cubens.

One is a printout of the FMI's Fair Play for Cuba Committee files as of the time of the Warran Commission. It has been years since I looked at it. The volume is about two inches in thickness. It overfills a box in which file folders come. I know exactly where it is.

The second is the New Orleans Police Department's FFCC file. "t is largely clippings obtained from other police, as I recall mostly florida west coest. I think I can lay my hands on it after a few minutes in the basement.

If these would be of any value to you, you are welcome to borrow them and copy anything you may want.

These came to mind after Paul and I spoke, as I was thinking of how he could accomplish what he has in mind. A possible source I thought of reminded me of these files. It is the Socialist Workers' Party (if that is the one known as Trotakyites). Despite the popularity of eaving that the Communist Party was close to and active in support of Castro in his early days, it seems that the SWP was more so. They might know of Heneral and others, like Hunt's crew and their associates. That might also know where FPCC people who might know are. Ditto for the FPCC files.

Many Cubens have records of violence in this country. I have files on them, mostly clippings. Some were funded by Ratista millionsires, about 40 of whom got out with millions and satuled in the Mismi ares.

Sincerely,

Harold Weisberg
