Dear George.

The enclosed came today. You should recall my referring Wrone to you to be sure he had a complete file of the Post's coverage of the assassing committee. That appears to be a major part of fart 3 of the biblio. Because it is by a publisher who enjoys high prestige in the field of hibliographies, I hope you and others at the Fost will be happy, as the record justifies.

Guth is a scholar who suffers from being over-qualified. His eredentials are that good. While I have not met him a friend who retired after a lifetime with AP did spend some time with him and spoke of him and Wrone in the most glowing terms.

Wrone is in charge of and really responsible for my archive at the Stevens Point branch of the Univ. Wisc. The request was from the State historical maximum association but after I met Wrone I selected that branch. To her become a good friend.

I don't know but I guess the book is in manufactture.

Best wishes,
