Harold Weisberg

On this coming Thursday at 11:00 A.M. Harold Weisberg will address an audience in the Main Ballroom of Coffman Student Union on the subject of the Kennedy Assassination and the Garrison investigation. He is the author of the first book to challenge the conclusions of the Warren Commission, and of the most extensive writing on the subject in scope and volume. His publications include Whitewash:

The Report on the Warren Report, Whitewash II: The FRI and Secret Service Coverup, Photographic Whitewash: Suppressed Mennedy Assassination Photographs, and Oswald in New Orleans: Case for Conspiracy With the C.I.A. which contains a foreward by Jim Garrison.

On March 3, 1967 the "Shington Post told its half million readers that these books were "the scenario guiding New Orleans District Attorney Jim Garrison in his investigation of President Kennedy's assassination." On May 9, 1967 the London Times said much the same thing under a headline "Mystery of Kennedy Inquiry Cleared Up" and noted that Weisberg "was at Garrison's side when the investigation was announced." Two months later, the N.Y. Times, which had a year earlier described Weisberg's work as "painstaking," devoted 40 inches of apace to a Cinquesion of his third book.

Many investigators of the Kennedy assassination including myself feel that Harold Weisberg is not only the most knowledgeable person on the subject, but has contributed the most important independent research. When I spent a week in New Orleans during March of this year I became aware that Weisberg was the hub of the Garrison investigation and was working around the clock amassing startling

new evidence. With the possible exception of Jim Garrison himself, no one is more qualified to speak on the subject of the conspiracy to kill President Kennedy.

Perhaps Weisberg's success as an investigator is a consequent of his previous experience as a political analyst. During the early days of World War II his investigations and writings, which exposed Nazi use of cartels for political and military intelligence, were widely credited with laying the foundation for the confiscation of enemy property and control of foreign funds. The Justice and Treasury Departments used the evidence he developed in legal and other actions against Nazi fronts and he received letters of commendation for his efforts from the White House, J. Edgar Hoover, and 50 members of Congress. He was consulted by Congressional committees such as the War Preparedness Committee chaired by-Harry Truman and also provided intelligence materials for the British Office of Economic Warfare. During the war he served as an intelligence and political analyst in the O.S.S.

arthough he has appeared on countless radio and TV shows, Weisberg spends most of his time investigating the assassination rather than making public appearances. We is indefagatible and has extraordinary success in convincing witnesses to cooperate with investigators, probably due to his straightforeward manner and honesty. In my associations with him I have found him to be a man of high integrity

and incredible work efficiency. In short, Weisberg is as unique a person as is the information he will present on Wadnesday on WLCL radio and on Thursday in the student union. But far more important than the man is his subject: the conspiracy to kill President Kennedy.
