

Among the minor questions that remain about this copy of the many
different Xeroxed copies of assorted versions that were Xeroxed of Xerox copies,
is ~~that~~ ^{the} fact that it does not bear the identification of File 77. That is described
in the "list of basic source materials" as of Secret Service origin and the
"Clinical Records of Autopsy submitted by ^{an}emorendum dated...12/20/1965". Now
that description exactly fits this copy.

*The copy from File 77
does not have the file identification number
it does not have the post-mortem autopsies*
