

4/27/72

Dear Js,

Your postoffice has begun to achieve its acceptable inefficiency of the past, your mailing including the Schurman-Gehlen tape and the Donhoff transcript coming with two stamps I'll resue today. (I have several of Donhoff's books. I'm told they are great. I got to read the transcript while awaiting someone in town this a.m. It is fine. I wish he had the record on Berle, which could have illuminated that part so. That great "liberal" staged the coup that ousted Getulio Vargas when he switched from gascism to democracy.

Explanations clips:Crazy(lit) Ronfro Hays is after or already as the war and Ray signed everything over to Foreman and Ray's local lawyer is also Hays'. O'Hara case strange. He is denied when he is sick and should not be administering justice, but Mack Hauer, who flashed the FBI Garrison file on Garrison to O.Pena, run for re-election, got defeated, and before his term expired claimed a pre-existing heart condition, he got a pension. AKA Justice.

Suggest this is also a reading on the changed political clime in N.O. He was one of the original three judges who did not throw the Shaw charges out, is the judge who accepted Garrison's State case when the feds charged him.

Pinball:I may look Weinberg up. He is in DC. If the Connally in this case is, as I suspect, Edward Bennett Williams' partner, I'll stay away from him. Wms is close to Warren and screwed Lil and me on our damage suit even though we had won a precedent suit and the only real question was establishing the amount of subsequent damages. He changed with WHITWASH.

Suddenly there is this outpouring a small bits saying Teddy is faraid of assassination. You also sent me John Filger's, which he did NOT do. Don't bother answering unless you have a theory, but I am wondering why. The only thing that seems to make sense is genuine, that he is trying to write insurance and is saying he will not be a candidate.

ITT clips:If I have not made clear, I would like back. My only interest is not ITT but the completeness of my Kleindienst file, not for now but for the future, because it is he who decided and is under the regulations in charge of all Justice Freedom of Information applications and cases. However, this is by no means important. If you want any of these clips, as if they are hard to copy, by all means keep them. Cartoons, not necessary to return, as I marked one today. The cost of copying these things can accumulate and I have no really urgent need. If you want copies of our memos on US CT Appeals and that of the government on his lie in my King/Ray suit, I'll send to keep or for copying and return, depending on how many I have by the time I hear. The crazy government attorney, now that Kl. is acting AG, has certified that as "deputy he was a liar, needlessly!

His clip not used here. Great! 'like the Greeks said it.

Strange thing about NYT Frank review is that although it say continued, it is the only bit.

Gadget any Frank ad, quote. Will compare NYT ad with that in "ock World." Frank will yet help us, with a little help, if we can get big-name lawyer interested in civil suit. Several are possible, as others are beginning to agree. Thanks and best, HW
