Dear Ed,

Thanks for the clips with yours of the 29 and 30. If you know anything about printing, one of the least economic things is one of 500 copies. So much of the cost is tied up in the very first one and so much thereafter in the hardback binding. Ordinarily, if they really intended people to buy it, they'd have used paperback, as most other government documents are printed, all by the Congress.

Clinton: except as to the certain identification of Shaw, these were credible, very credible witnesses. I was never in the courtroom, but I met and spent some time with most of them (not the black) and they are solid citizens, regardless of racial and other indigenous beliefs. The FBI's mishandling once they could no longer avoid it lends credibility, as does Shaw's unquestionable perjury about it and his enemy's help on that particular point. (Lloyd Cobb.) I do not doubt the incident.

If you mean too bad JG's people didn't investigate the King ass, thank your blessings. If you mean JFK, not one is or was competent to do the most elemental part of an investigation.

Thanks to Jerry I caught and taped both Bishop appearance on "rost and after each sent him a certified request for equal time. Today I got back the receipt for the first. You are too kind to that whore Bishop. He actually maligned the Secret Service. And he also called King a physical coward. Nobody has ever collected the attacks on him. Bishop spoke of the sick owman only. But he was stoned, too. And the "emphis story is opposite his version. He wat back against the expressed desire of everyone, and on a plane delayed by a bo,b threat. He had undergone his metamorphis, had abandoned non-violence as an American weapon (every Abernathy admitted this is LOOE), and then he was killed.

I think receipt of my letter kept Frost from going into the assassination. I think he probably told Bishop in advance. But I began the second letter with the charges of calumny against him and the SS, and I will carry it to the FCC, as I have already with Griffin.

If you can get a copy of the rules of arbitration in NY State without great sweat, I'd welcome. I have to go after O&D under it under the contract, of which I have finally gotten my copy!, for they are skinning me out of over \$4,000, and we are almost 100% flat broke.

Sincerely,

Dear Harold:

As per the attached, publishers are under great pressure from Washington - increasing pressure - - - - - .

This pressure combined with the economic concentration of the conglomerates casts a dark shadow - - - - - .

Did you believe the Clinton episode at Shaw's Trial?

Even if the man was not Shaw (perhaps Bannister) the incident, if true, is provocative.

Certainly, the role of New Orleans in The King Case was pivotal.

Too bad N.G.'s staff didn't investigate it.

What lost opportunities!
Best Wishes for The Holidays.

Sincerely,
