

LARRY MOONEY PHOTOS

HEY LIL - REMEMBER THIS ONE?

The death of John Wilkes Booth remains a mystery. Following Lincoln's assassination, some historians traced him to England and India. Others speculate that he faked his death in India and returned to the United States under the assumed name of David E. George or John St. Helen. On his deathbed, this individual claimed he was John Wilkes Booth and since there was a reward for the body of Booth, the mortician did not bury the corpse but had it carefully preserved. The above photos are purported by some people to be the John Wilkes Booth mummy, now in a private collection.
