Dear Jim:

From a tiny paragraph or two in the New York Times I read that you were in Cincinnati in oral argument for 75 minutes and I know you must pretty well worn out from that.

Nothing happens here of note. Recently through agitation I was able to appear on the local CBS station to refute the November programs, but the whole thing was a charade and absolutely stupid. It was late at night, the entire staff of local TV stations are in a category of stupidity that I hesitate to even assign--dumb dumb dumb. But I made a point or two.

Recently as I mentioned to HW the Abzug committee sent me a note asking for anything I had on the Warren Commission Records in the way of articles etc. I had written to ask for copies of committee prints to assist "my scholarly studies." I replied by sending the Capital Times stuff which I thought could not ~~hea~~ hurt since it merely repeats what you and HW had already told them in far greater detail and with much more insight and gave a two paragraph statement on how valuable the freedom of information act was. They appear to be without direction, a kind of drift toward a solution and there seems to be none short of facing what is what and that is terrible.

I just read Goulden's book on the federal judges Bench Warmers which is in ballantine paperback. The stuff on the D. C. court of appeals was very good.as far as a lay man can decipher the crap. He mentions a couple of the good old boys that gave you trouble and I assume you read it.

M^ure crazy books are appearing.

I have received your recent material on the court proceedings.

Give my regards to all and a special hug for Miss J. C. Lesar.

Regards

Dave

Dave
