Dear Mr. Agel,

I cannot promise you, as does your ad, a good time, but I'd hope that you find my book just sent you separately, "WHIPWASH: EPLA REPORT ON THE WARREN REPORT" is "an extraordinary experience", "definitely not dull", even important. Its history is in the preface.

This book is entirely without conjecture. It comes from only the official testimony and exhibits. It is supported by a third of a million words of notes. And it found the publishers and agents afraid of it or any serious approach to the subject.

The climate is now changing. But after 15 months, I would wait no longer, and I fear a responsible analysis of what may be the greatest scandal and shame in our history had awaited aeriating too long. This edition is on credit and is also a search for expeditious responsible normal publication. Until then it will be offered in whatever way seems possible.

I'd like to interest you in selling it at the normal bookstore markup, for I have no funds for advertising, or to advertise it for a commission, sending me the addresses and my share of the money, and we will mail the books out.

We'll appreciate any help or comment.

Sincerely,

Harold Weisberg
