

The most fortunate accident in our recent history is the convening of ~~an~~<sup>that</sup> unusual and very brave ~~group~~ integrated group<sup>now</sup> of men/sitting as a Grand Jury in New Orleans in Jim Garrison's investigation of one aspect of the Kennedy assassination.

In all the events in the 43 months since Kennedy was murdered, the most encouraging to me is the willingness of this Grand Jury to hand down indictments. This means that for the first time our society is beginning to function. Among the many great lacks in the official fraud called an investigation were two that to me were most important: the normal processes of our law and concepts of justice were bypassed and the press was banned from what amount to star-chamber proceedings.

Now, thanks to New Orleans District Attorney Jim Garrison, we will have a judicial determination of fact, before a judge and jury, with two sides represented, each to keep the other honest and ~~with~~<sup>within</sup> ~~the~~<sup>the</sup> ~~rules~~<sup>rules</sup> prevents its writing of the rules as it goes, and all of it will be reported by the press as it happens.

If I can judge from my appearance before that Grand Jury and my contacts with Garrison and his staff, this is a determined investigation which will not be diverted and is so prepared for a real fight it's like Dodge City. All the lawyers carry guns. But this is not their real fight. They are defending themselves against Washington.

Washington is going to lose, which will be a victory for everybody else. When it is all over everybody will know what <sup>we</sup> have been writing since the first of 1965, that the CIA was involved in their assassination.

I cannot speak for Garrison and I did not ask him what his case will be.

*to testify before this grand jury*

Before I went to New Orleans I finished CIA WHITEWASH: OSWALD IN NEW ORLEANS. This, I think, is what Garrison will in his own way prove, that there was a conspiracy to kill Kennedy, with New Orleans conspirators and accessories

*there was an FBI Secret Service Camp (the subtitle of my second book).*

before and after the fact. *that Oswald was involved with the CIA, due that this is why*

Oswald was never the head of a New Orleans Chapter of the Fair Play

For Cuba Committee, for that never existed. *INVENT A* It cost him less than \$10.00 to ~~print~~

~~what it took to~~ fake a chapter. Then he went out and got himself arrested pretending to be a big pro-Castro deal, carefully arranging for an extensive press.

With that press in his pocket he went to the Cuban consulate in Mexico City and asked for a visa. When he didn't get it *he* ~~it~~ <sup>he</sup> ~~and~~ blew his stack and with it his

*bumming*

cover, ~~he became~~ a very expendible man to his associates - right-wing revanchist

Cubans with their own ties to CIA. Who hated Kennedy more?

~~the whole story is a much more interesting one after Washington's opposition.~~

Aspects of the case are like a Gilbert and Sullivan James Bond, with a munitions heist by men who now claim they cannot be crooks, as charged, *what y* because they did ~~not~~ steal, they were patriots - working for the CIA. Some of that boom-stuff was staked <sup>c</sup> *in an office* ~~right~~ right across the street from the main Post Office in New Orleans. And it is a narrow street.

The characters are wierdies first and snooks next, like ~~an extension of~~ "Psychopaths Sexualis" distilled by the Marquis de Sade, but it is not the *officer* ~~strange~~ sex that killed.

The FBI knew all about it & was part of it - and was silent when it investigated for the Warren Commission. The brilliant maniac (both literal) David Ferris, whose strange death as soon the investigation was publicly known is unconvincingly officially listed as of natural causes, was socializing with FBI agents ~~mixing~~ when the President was being murdered, which the FBI reports do not say.

Garrison is quite a guy. He is so big his unconcealed pistol locks  
 smell. His friend who he had indicted for perjury, <sup>the,</sup> give-talking lawyer  
 Dean Andrews, dubbed the DA the Jolly Green Giant. Andrews is one of the most  
 expressive <sup>of</sup> men who is usually on the ball. He ~~isn't~~ missed here. Carriosa is  
 not jolly, but deadly serious. He is determined to <sup>finish</sup> ~~do~~ what he has started,  
 get indictments and convictions. He is anything but green, witness the self-  
 revelations by the CIA types and all of them that he has already smoked out.

But he is a giant. ~~XXXXXXXXXXXXXXXXXXXX~~ In his concept and understanding,  
 in his capacity for work and above all in his guts, he is bigger than 6'6".

Who else would tackle the CIA, FBI, Secret Service, Attorney General,  
 most of the press and maybe the President, all at one time.
