03wold's Income/ Income Tax, cD 107:37-9
As you may recall from wimevash, Oawn $\mathrm{H}^{\prime}$ 's finances heve interaeted min Iron tae first, for it is not poseible to scrount for more then 太 600 in ifs poeseusion, aside fron whet he may have had in his pocket, as of ton time of bie Merine's diecharge.

Some time in the pest I sunght gcoese to his income-tex returns. Theg were then (and 1 nresuma still are) clsssiffod, altandin this nead not ave bean the cese isax and is not alwaye.

But I remain ith nothing more thin susnicions, no proof he hed any erester ircome thet alleged, evin thouch all hir expenges ere not tabulated in the oficial accountings.

I haven't hec time for geperete comont, kut Jim's list of letin names is potentielly very velueble. It is en enomous zoric. Pleasa thenk him for taking the tine and doine taut kind of trakless job. If be gets any incuiries ebout eny of the $n$ mes, i asy be able o helphim. I'll reat it before I file it, but I HFTe, as $n_{2}$ now, merely glanced at it. The sind of thing where I may be able to be belpful to othurs is when I see the nomn arensborg, ps I did. The ia CIf, bs is her group ( 0 in $\mathbb{N}, 0$. ). I eleo heve unpublished information on tham. It may nevar intareet enjons else, but if it does, - heve it. Hai socse buay liftle beos not been engnged in a turning-off job, one of my younger correbpondants would bave car ied some of tils further foxwsid for ue. There also remeins tha poseibility thi is the group to waida Shuy geve office s: ace ia the old ITM, sogetaing Aleock sbandoned in micquestion mile interrogating Shas's former secretary and never asked him about. Alen, with no conqulste in the IMM, it mey have figured in ibo's tuinicind inpisckinz tast place to picket on camer, tie one place he rent with edvence notice to the press/IV.
