Dear Gary,

You phoned after ~~re~~ writing your 6/30, which came today. So I know the press conference you refer to is that of 11/23, which I do not have. However, I am certain that it was covered and that Gary Mack did much checking on the remaining film. He may be able to tell you who has it. In fact, he may now.

Artwohl made no mention of NA! and I've not heard since that he has it or has made any comments on it. He phoned because he feared that Mary Ferrell was going to destroy her files. He asked me to write her. I did. I urged her to give them to The Sixth Floor.

We are being evicted for four hours tomorrow so that an exterminator can get after an infestation of carpenter ants, not all that usual when one lives in a woods. I'll read the enclosures then. Thanks for them.

On the Rydberg in color, I do not want to put you to any real expense or trouble but they would be good to have on file. I'll not return to that aspect of my work. Too much to do in other areas.

The only negative reaction to NA! is Livingstone's that I sent you. NA! was written before his Killing the Truth.

I do not remember what I said about him in it, and he is not worth the time to check. Unless as I suspect what he sent me is what he submitted to one of the newsletters.

If it is published and I know it I'll respond.

Thanks and best,

Harold
