## 8/16/96

Dear Gary,

"ound this on my desk. "hought I'd mailed it some time ago. Sprry.

The FOIA lawsuit in which I used what I refer to as the FBI damage -control tickler was CA 78-0322-0420. It as the combined Dallas and New Orleans field office cases. The case agent who lied his head off on tickers was John N. Phillips. I used that and other FBI records to alkeged perjury to him, under off MMY MY.

I've done much work of which you have no knowledge in recent years. I've said just about nothing about any of it because there is nothing I can do with it and because 1 do now mant to be tied up in questions about any of it, especially not from the nuts. Several years ago I finished the rough draft of what  $\overline{I}$  have no extea copies of that  $\overline{I}$  think might interest you. Please do not alk about it because - do now want to waste any of the time that remains for me in pointless is correspondence. In it 1 address motive, means and opportunity. It is qubte specific in stating it is not intended or presented as a solution, that it does no mode than address motive, means and opportunity with what was publicly available andhad never been drawn together that way.

The title is <u>Waketh</u> the <u>Watchman</u>. The subtitle is <u>Our Strangelovian</u> "ilitary and the JFK Assassination.

Several professors you do not know are more than merely impressed by it. As are those who have seen <u>Hosty's Pudding</u>.

The copies addressed to Gallen are for your information only, to give you an idea of why I've not made any further efforts for publication when I've so much on paper that could go. m'/

I believe that Publisher's Group West might include a stall publisher who for might have an inverest but I've not written the guy who runs it, Charlie Winton, because he distributes for Carroll & Graf and because Gallen is his counsel. Gallen was a dear and cherished friend until he became copublisher.

Haid
