

... of these appeared in any paper I saw, none around here because Jim sent me the Star stories and I'd had that of the NYTimes.

It is valuable, so thanks again.

The other records did come. I'll give them to Jim, as I think I said.

You may not have heard and I may have forgotten to tell you but as you may remember I believe would happen I did beat them in court and did get these records free, with a nice speech from the judge and some strong words to them, neither fully in the enclosed story, courtesy Jim's friendly corner xeroxer. He saw the story and made Jim 50 freebees.

I expect to get the first 40,001, too.

File cabinets bought and in place. Only being snowed in has prevented the delivery about which in the end the FBI was good, getting them into the mail of 1/18. They'll come now this afternoon or tomorrow.

Again many thanks. Continue to assume that maybe we did not see that story around here, whatever the story may be.

Best,

1/19/78

Dear Anwar,

I thought I would send you the enclosed articles in case they didn't appear in the DC papers. Wonder what the "disdainful language" was?

By the way, I stopped by the Archives before I left for DC and found out all the ballistics evidence is on hold until 4/15/78. Maybe they ^(HSCA) are going to do some spectro on NAA, which would be interesting.

If you haven't received the FBI spectro worksheets on the Harper bone fragment, let me know.

Best wishes,
Mark
