

*Hy*

New Address: Rt. 7, Frederick, Md. 21701 475-8186

10/13/67

Dear Mr. Alloway, I'm glad you understand how time presses upon me.

I do not see a third man in those pictures. I have studied them carefully over a long period of time. I have blown the individual Estruder frames up to five feet in width. Some of them are remarkably clear. In one picture what you have marked is President Kennedy's left hand.

I have seen thousands of frames of pictures, taken almost continuously from Love Field to the scene of the assassination. I am confident it is no one but President Kennedy on the back seat, no one else there but his wife with him, and I am without any doubt whatsoever that it is Governor Connally who was wounded.

The remark about President Kennedy's size comes from the fact very few people realize he was a six footer. Including me!

Tippit, obviously, could not have been killed once at the depository and again in Oak Cliff's.

You can do the same thing with pictures of almost anyone. Particularly is this easy with the pictures I have of Oswald, but I have no doubt that it is Oswald who was killed by Ruby.

Mr. Thompson's murder map is interesting. However, there is much of it that is taken out of context, too much depending upon unsupported unclear recollections, too much that I just cannot agree with.

I do appreciate your taking the time to write and sending me these things.

Sincerely,
