P.S., Les,

Lanes has gotten no mileage with a riporr of a legitimate and significant record. But it is a ripoff, naturally from me.

And I published it and you have it, in Post Hortem.

It is a receipt by two FoI agents for "a missle" removed from JFK.

Getting it required time/and effort - years ago. I've been working on it a long time. As recently as 3/28, which is before have started trying to use it, Jim questioned some FBI agents we've been deposing, including about this. It is in

My first knowledge was from Lonnie, who had phoned me to tell me a younger reposter on the ews-American would be asking me about it. Lane had done some shows in Baltimore and "I think held a press conference. He gave copies out, saying he had obtained thes by FOIA litigation.

Darring-do.

But once I had obtained and published it certainly was the hard way!

Wouldn't be the first time. He conned the ACLU into filing an FCIA action to get a Ruby record that had not been secret. "y first dated copy is of 1959. Then he held a press conference and actually got space. Last year, not 1969 or earlier.

If it is past time for him to come up with something, be careful. He hasn't yet.

HW
