Dear Mr. Weissberg,

your

I have read both books from cover to cover as well as most of the other literature on Kennedy's assassination. But your material alone is convincing and exact. Please accept my congratulation for your courage, sense of justice and insights. Your's is also the only material which permits one to set up a theory of "the motives" of what you rightly call the most important event in US history.

But what a discouraging document to read in the beginning of this new year! It is to be hoped that the search for better knowledge -- since "the truth" is probably never to come out -- which you have pioneered will result in diminishing your fears and our fears that our society is disintegrating.

I shall read your third document with fascination and look forward to its publication.

An admiring Reader
