

anson on KGO 12/11/75, Ronn Owens Show

Says he was not turned on to JFK assassination and believed WR until Heraldo Rivera show, then began his own investigation. But also says that he is lazy.

Formula: No commission coverhp. Yet he ripped off in New Times and uses here excess tr. that proves this intent.

Imposter story: didn't even check files yet claims to have investigated. Uses straight ones Harris false version this long after Harris had to know better if not when he first conned the Times.

Concept as first here expressed of LHO as intelligence agent right from WW.

Barina "we now know" lied in being "red." Right from WW, different formulation, uncredited as all else.

Zapruder heard the shotx from over his right should. WW and FW, uncredited.

Formula and disclosure of no real investigation or knowledge: "The jury is still out on Oswald's guilt or innocence."

"I stay away from that Dealey Plaza stuff." This is where crime was committed and where the clues are or come from. Formula. He does it his own way while deprecating others. His story on Oswald as an agent resumed is all cribbed, even the lie that LHO used the N.O. address of an organization Howard Hunt started. The rest is all from my work, including that LHO "had only \$200 to his name" when the Commission said \$1,500. Even the three days in Amsterdam he says were unknown were and I think are in the executive sessions I sued for and published and again is uncredited.

The exactness with which to this point, as in his Intro, he follows my public statements is ~~xxx~~ incredible. Almost word for word and exactly thought for thought to organized crime formula he siezed upon in the absence of evidence. Noted 12/25~~2~~ 29/75

Pretends in answer to question that he has conducted his own investigation. Then says that from his investigation no reason to believe WC, FBI or CIA deliberately deceived people.

Until now all investigations irresponsible.
