

Army Intelligence - JTR/Feif

ADIA Office  
Ass't Chief of Staff for Intelligence  
ATTN: DAIM-038  
Rm 2B-481, Pentagon  
Washington, D.C. 20510

3/14/81

Dear Sir,

Enclosed are the uncated letter to me from the office of the DAG and my today's response. These pertain to information about the assassination of President Kennedy, particularly to the autopsy and all surrounding circumstance. In particular they also pertain to the recent book, Best Evidence, by David Lifton, and to all information provided to him.

I regard what Lifton alleges as untenable, baseless, and defamatory of many innocent persons, and as a corruption of a tragic event of great historical importance.

I would appreciate any information you can provide. It will become part of a major historical archive on this event, perhaps the largest single such archive, deposited in a major university system.

Years ago I asked the Army and Army intelligence for all pertinent records. I received nothing except the statement that all the Army's files had been destroyed. I believe that any such destruction would have violated law and regulations. I hope that in the ensuing years other copies of these files or parts of them have been located. If so I ask for compliance with my prior requests also.

I am encouraged in this hope by the fact that the Navy recently began to process a request I made of it in 1977. What has been provided since then has been quite helpful and is of considerable historical importance.

If you have reason to believe that any pertinent records may be elsewhere I hope you will forward my requests and provide me with copies of any referrals.

Thank you very much.

Sincerely,

Harold Weisberg
