Dear Jim ,

## 8/5/75

Your fascinating $8 / 2$ came today. The enclosed valuable elips include only one I'd roceived from any other source and that one is barely legible, so many thanks on that, too.

I mey have to intorrupt this but it is so fascinating I'm going to went to try to explore perts of it with you zere. And I'd liks your pernission to show it to a friend who is a progresgive-mind history prof (Masaryk in particular) who will be here befare too lons, Howard and Jim Leses.

L1. has a new olient for setting up books. Forturetaly ho is in the saifuringpool busines and is trying to find the leak in ours. This can cause the interruption.

By a remaricable coinciderice, re UFi's, we had company last night, a man who was hare whon we saur what had to have been one. Wis recollection is startling clear and colnofies axactly with owze. He was telling his compenion about ite

On Poomestal, I roonll quite eloariy, if not my scurce, that he had boen troublad by the buying of the Italian election. If anyono other than I reported it frow what I was ablo to put together (quita posulhly Irem overifina uith a short-wave receiver that was part of ny redio news setup then) I don't remomber it. I think ny amployment there didn't lant much longer, ef.ther.

The collegu student, Moyd, to whem I'd mentlonod the opdnoidence, has done sone checiding on his own. I have Kis notea. Remaricable stuff in paint if one checics back, I may asic another atudent to try to geat copies. I think much of it was IMIImes but I've not read it. "eraly ilstened to lis eccount as his notes refreshod his recall. There is no possibility of reasonable question, his jump, if it was that, was made posailate when the purpose was supposedly the opposite. (idice Ruby?) I had a very strong feeling at the time that it had been contrived to make it possible at the least. This tums out to be tho case from what has boen published.

Compazing this with 01ann roquires coajecturing. But Judging from the politifics of the rest of the family of whom I know and the ldind of people they are I think it is anything but unlukely that he had had a change of heort over the wouk bo vas dofinge

Asame this and recall that he was the only one of that group with any strong reaction and an $O D$ is indicated if not certain. Mow romember that nothing was done for two weeks, two weeks in which he uas in congtant contact with those who knew of tha admindstration and the radical change in the man. Tho were cortainly CLA. These eertainly reported beck. There certainly had to be concern over the entire affair, espeoially any part of it bedng knom. Misis means that on this basis alone immediato and redical care was required, begioning with isolating him so he could not bahke. It was not done. The man had top-secret clearance and worked with those who did on projects so alasufied. Yet nothing vas done to protect gecurity sgainst the quite viaible threat from a posaibly tarangod insider with the most intimate knowledge? (There is a base hospital and it is but a half-hour to one/of the supposediy better private psychiatric instítutions. Then it was an hour or less to Bethesda and perhape 15 minutes more to Walter Reod, both of which have mecure and woll-ataffed paychiatric branches, a la Forrestal. Then there wes the CIA's oum staff of shrinks. It is beyond bolief that of all the many involved, nobody thought of taling any mpasurea. Or, halping the man and protecting secrets by bringing him around was not a consideration for, two wocles if one asoumes this was the neal puryose of the nitimate trip to IYC. 7 hat ain't the CIA of which I know.)

I remember the Hasaryle dnath and ny wonder ovor it thon. What sas neror in tha papers is what precesded it, Hewtonian aiplomacy: th every force thero is an equal and opposite torce. The inititnl force cane from un. The USGR wanted unniligned governmonts in that part of Europe. Hemombor their Ahatrian offer wo finally accepted? We applied force, they apyised countortorces and Kasangis wont. lifth him wont the possilility, if it applied, of an account of our pressures. I recall nothing of his past or the USSR's
cpnduct in those days and countrios that required him to do hinsself in. If he were the lind of patriot described and not irrational or delundonary, he had every reason to want to stay altve. (Lator those who took over were pretty rought, but as I recall it wosily in their faetionalinan, ss with Kadar.)

FIR cortainly is a aystery. \#le was of an age and had Ifved a life that could havo causod his death but he did so suddrly look so much worse and it was so much of a surpalse. He cortainly had to have been a tough one to hold up as he did to all that he did. I suppose, lacidng obher helath infoxiation, thris comas to why didin't he cave in when the prossure was great compared with it was the continuing sitross.

Thore was, aside fros= other forces, part of the military that was very much opposed 氹 to hin lons befora we were realiy in tha wro. I think I told you the Nelin Craig story. You know the plot to get Butler to ride that white horse. There were
 IIs pollcy was basically opposed to that of an fimportant yert of the aflitany on the fer sust. Thare is so much of thia!
heoduds se of a story. When FDA died anotivar enlisted man uhose rifinor function in USS I do not recall -ho ras not in civvies - who uthin its atarted collecting a fund for an PDR memorial. We ware told by hoadquartors to stop it. And I moan so fast!! We hadn't even rually gotton started.

Kociauver sppearei to be in tha moat robuat healthe
(I did not know that reulifia could be fatal. I knen of it from having ueed it to eurb tha cariibolism and Violent behavior of our helicoptermbeste ohickens. Ciba got FRA approval for another elaim based on this work. Synsthosized it is reserpine, Seryasil the trade name.)
tho Stovenson thing was aiways very odd. There is one consequence, or at least a change that abruptly followed it. Severedd wes with hin. Severiad changed his political Fiow imediately and aharply.

I'd forgotten about Fitagerald and Luce. And the significant Clou En-lai connection.
The others aro all mysterious. Ilow reny of these cofnciconces can we regard as no Hore, no other than cafincidenco? til witin the vistikte thing.

How that sc much more is cordug out - and I look Lorvard to roeding the new clips on this - you are right that re should koep it in wind.

Bafore I get to other work, a note on the fine young tean Seto olson. $I^{1} d$ phoned him ixsodiatoly becauso I falt the CIA documont of wifoin you learuod Tia Faolfica micht intercst the Iaryer and wens emoueh for a mow in court. Fric sacmod urecoptiva when I urged ith to urge the laryer to use woIA fmediately so that there would ba culjeiditity in manory-haling recorts and to foreo thasir locating on the filitne of thas instiel requat. It was a month before I heard that the lavyer, apparently indepondently, had decided to. Can you fragino what molted in a montil?

In today ${ }^{\text {a }}$ nail and unread a fen nore CIA documonts having to do with olasaifaication and deolasnification, a few from DJ, a withheld Nosonko page and some novec that appar figut the dntur as I inventoried them to coinedde with the appearance of WW IVI Force and counterigree from Jeff and Mutt?

Wotvo hed a washing of the air by rain but the hat is doan only dichitif, lie have hadd $100^{\circ}$ days and $a$, ong atretch of near it.

I bave Lid your lettor to road. She is as fascinatod as I. Thits whole busineass is quito provocative.
