8/26/79

Dear Jeff,

Catching up on some filing today I came across my 5/17/79 in which I inquired about the slides you had before then offered to others.

I suppose the reason you did not answer is the same reason you did not let me know you had them.

Probably my added criticisms for which you have no answer, like of conclusory descriptions of some of the slides, added to this.

If you've turned out another bulletin and not sent it my guess would be that this is for the same reasons.

Plus the unpleasantness of criticisms you cannot answer.

No matter. I can make what few speeches I'm asked to make without those slides and while perfection is not a human state I know of no reason to apologize for or in any way regret my attitude toward and criticisms of the irresponsibilities and dishonesties of the HSCA. I wish for some younger ones that I could feel that in years to come they will be completely satisfied with themselves for this period. What they have done they cannot undo not can idle words to the like-minded wipe it and its consequences out.

Today I also read Dodd's separate views. Too bad that those who had some input didn't know the facts of the case. It might have done some good if he had.

Sincerely,

Jeff Goldberg

5/17/79

Dear Jeff,

From Paul I received the three pages of your two lists of HSCA exhibits of which you have made slides. I may want some of the slides, so I'd like to know how much they are. Before going over the entire list I started to make ~~my~~ marks alongside of those in which I might have interest and then realized that I have a possible use for the lists themselves in FOIA cases. So, if you have mimeographed your lists I'd appreciate six copies. If you have to xerox them, I and I'll do the extra xeroxing here.

I assume that the numbers in ~~paren~~ represent the HSCA's exhibit nos. If I am wrong would you please let me know? Also if by now you have the other numbers.

Some of these relate to what was withheld from me under FOIA requests.

King: I take it that 3 and 4 are Joe Low pix. Are they full frame or cropped? I know I'd like a slide of 3. I'd like to see the other two and will return them if they duplicate what I have. I'd like to see 10 to determine whether it is identical with the view I got in GA 718-79. If so I'll return it. (You should know that if so it is a staged rather than an actual picture, as the block in it should have told HSCA and as I state where it appears in Frame-Up. I'd like to see 11 to determine its fidelity and the area it covers. Do you know its antecedents, when taken, by whom, etc.? Between 4/4/68 and last year there were alterations. I'd like to see 25, too.

I presume you realize that your descriptions are conclusory. Are not you the people who joined in the claim that it would be proper to use the word "alleged" with regard to LEO? Assassin's bundle when there is no connection between it and the crime? Ray's transactions with his brothers in Canada when neither brother was there? And all that bank robbery nonsense?

(This reminds me. When I wrote Kostman's father through you I asked you to forward my letter. Your response was that you'd send my best wishes, etc. I have not heard from his father. DID you send my letter, as I asked?)

I have made some slides of the JFK exhibits from the press handouts. If yours are clearer I'd like to keep them. Some I may not have: 1, 6, 8, 11, 29 and 30.

I am particularly interested in the "enhanced" head X-rays, one in particular I saw on TV. It is a side view, I think from the right, showing the location of fragments.

Your list does not include what I regard as significant. Perhaps because it was too significant for HSCA. Howard Hoffman noticed in the Clark Panel report the identification of a 6.5mm fragment at the back of the head, low. Is there any representation of this in any of the evidence?

If you obtained dupes of the two Moorman pix I'd appreciate copies of them if the first shows a different proportion or that part of the top was removed. (In Photo. WW I go into the fast shuffling of her pix, with both SS and FBI involved.) Based on what was then available. I presume more is now.)

I do not know the form your research is taking but if you prepare a list of exhibits or witnesses by the volumes in which they/testimony appear I'd like a copy of that. I regard most of this stuff as a waste of time but I do have selective interests, depending on the exhibit and its source and the witness. An example of this with the witnesses is Guinn and his report, which duplicates my FOIA efforts of a decade and Murtaugh, whose expert description of the nature of the FBI's King investigation confirms my earlier one (and thus of possible FOIA uses). If any further Guinn info has come out it is of interest.

Thanks,

C. Acoustics-
