

Dear Ed,

2/14/75

For me I've splurged in a way that means work I must do today, so I've less than the usual little time and none for real explanations.

If you remember the cupboard that was built into a wall of my office, I took it down and have bought two cheap filing cabinets to be delivered tomorrow. I'll take the 2- and 3-door jobs into the basement for dead storage and thus will have three more file drawers (that will overflow soon enough!) I've put shelves up and have to shellac them before I get for 141.

The GO clipping from Waterloo headed "Gregory Believes Hunt Killed JFK" can be quite important. It is unattributed and incomplete. Part of the lead seems to be missing (in the original) and there appears to be an overlay which eliminates more. I'd like to have the entire thing and the source because this thing is turning into a real "opt. Disinformation endeavor.

2/10 you note "What publicity Gregory has gotten!" I'd ask then what will it mean? It provides an ideal cover for the coming whitewashes, more of the most extreme rumors to debunk with effectiveness and make all the shit look like manna.

This stuff has been very hurtful. I am not clear on who is prodding Gregory into this but have a few suspicions. I know some of the alleged evidence, certifications from criminalists that the pictures contain identical features. (Must be penuses mere mortals can't see!)

The way this is going the only means of our recapturing any credibility and stopping all this exculpation of the sproks may be to take a stand against it. As of now, if he'd promise not to sue Gregory and Grodin, I'd help Hunt. And I am confident I can!

Anyway, please let me see all this you get as soon as possible and please make a special effort to be certain of completeness and identification.

The kind of thing for which this can supply a kind of cover is the appointment of less than the best to the various committees. Rumor Marshall to be Church's guy!

Because of this any word from or about Boston could be quite valuable. Particularly those of the cowboy theorist, his and the other sheet, and whatever else is in the underground press. It looks as though it was sized upon as the beginning point for a major Disinformation job.

It has killed attention to WWIV. I never get station inquiries about that now and all the stations catering to the young are off on this kick. Sales, of course, have fallen with it. (AM Canada taped me early last week for showing this week. I don't know when and I've had no indication it was aired.)

My mail is burdened with the concern of those who've been conned by all this rot. This one is so insane that even Bud is worried. Lesar has been from the beginning.

Thanks and best,
