Keynote Speaker • Walt Brown

Walt Brown, Ph.D., impressed 1993 attendees with his intelligent analysis and insightful commentary leavened with a quick wit and motivational inspiration.

Mr. Brown has been studying the Kennedy Assassination virtually since it happened. He has written *The People v. Lee Harvey Oswald*, (1992), *Blue Death, Red Patsy, White Lies*, (due in 1995), *The Warren Omission*, (also due in '95), and has a JFK monograph due this month from Prevailing Winds Research. He is also the author of John Adams and the American Press, to be published in early 1995. He is a regular contributor of articles and book reviews to the major JFK journals, and serves on the Advisory Boards of the JFK Resource Center in Dallas, as well as the Coalition on Political Assassinations (COPA). He enjoys writing suspense fiction, and is also working on a book that will take a 'unique' look at Watergate.

"... This is a time for courage and a time for challenge. Neither conformity nor complacency will do. Neither the fanatics nor the faint-hearted are needed.

"So let us not be petty when our cause is so great. Let us not quarrel amongst ourselves when our nation's future is at stake. Let us stand together with renewed confidence in our cause. . . ."

assassination
symposium
john f. kennedy

Dear Participants,

Welcome to ASK —the fourth annual Assassination Symposium on John F. Kennedy.

We have endured 31 years of frustration. It now appears that we are making progress toward our mutual goal of obtaining access to information about the death of the President being held by government agencies —much of it needlessly classified. Access to this information could ultimately lead us to the truth about President Kennedy's death.

The Assassination Records Review Board offers promise that we may finally obtain full and complete disclosure of all assassination related records and files.

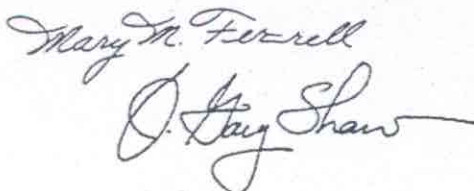

We believe that the importance and necessity for conclaves such as this one here in Dallas —the historical site of one of the most tragic events in our nation's history —will, no doubt, continue for years to come. Our intent at this time is to be here for you.

The contacts, networking and sharing of information generated at forums such as this one, have made the task of sifting through newly-released documents so much easier and more productive. It is our belief that only by working *together* can we realize our ultimate goal —the real truth about the assassination of President Kennedy.

With this in mind, NOW is the time for real solidarity. It's time to put aside our minor differences of opinion and cease all infighting and back biting. Now is the time to come together and work as a formidable force for truth. Only then can we work constructively within a unified alliance representing millions of concerned citizens. The combined knowledge we have gained during 31 years of working with documents and exhibits from the various investigative bodies could be of tremendous help to the Assassination Records Review Board as they carry out their mandate. Let us not weaken our potential influence with petty differences.

As always, we appreciate your attendance, participation and support.

Yours in the pursuit of truth,

Mary M. Ferrell and J. Gary Shaw

1994: Toward a Consensus on the Evidence in the Assassination of JFK A Work in Progress by G. M. Evica.

For three years, the ASK has been working toward a definitive consensus statement on the JFK assassination. This year, we are asking a select group of JFK researchers to revise, amend, delete and add to this developing statement. New documents recently released, for example, should have an impact on this document. Researchers should consider developing paragraphs on portions such as "Who Was in Mexico City?" and "Who Killed JFK?"

We gratefully acknowledge your continuing contributions to this work in progress.

President John F. Kennedy was murdered as the result of a conspiracy. Lee Harvey Oswald was not a lone assassin responsible for the killing of JFK and the wounding of Governor Connally.

The case against Oswald in the JFK murder is without merit, based on broken chains of evidence, on altered documents, on suppressed, changed, or planted evidence, on withheld spectrographic analyses, and on doubtful ballistic evidence.

Lee Harvey Oswald did not murder Dallas police officer Tippit. Compelling evidence that one man (other than Oswald) or two men (neither of them Oswald) shot Dallas police officer Tippit was ignored by the Warren Commission. Crucial and obvious inconsistencies (in the ballistics evidence, for example) were left unresolved by the House Select Committee on Assassinations.

Lee Harvey Oswald did not have his day in court. His right to a fair trial was jeopardized by biased remarks made by Dallas, Texas, and Federal officials, by the mishandling of evidence, by improper chains of evidence, by illegal searches, and by legally inadmissible statements attributed to Marina Oswald.

After the JFK assassination, a group of law enforcement officers and investigators at both the local and Federal levels participated in a major cover-up and obstruction of justice.

The Warren Commission ignored a dozen Dealey Plaza witnesses (including several law enforcement officers) who reported men showing Secret Service credentials or identifying themselves as Secret Service agents who collected evidence, took statements, and reportedly held witnesses in custody. The Secret Service later stated, however, that none of its agents were in Dealey Plaza at the time of the assassination. The House Select Committee took note of this series of events but did not investigate its conspiratorial significance.

J. Edgar Hoover and top FBI officials possessed substantial information that CIA-connected Mafia bosses were involved in a plot to murder JFK, yet Hoover did not share this knowledge with either the Secret Service or the Warren Commission.

The Warren Commission ignored leads that would have led to CIA-directed plots against Fidel Castro directly connected to the JFK assassination. The Commission also ignored evidence of Jack Ruby's lifetime involvement in corrupt Teamsters' activities, Syndicate business (including drug traffic), police and intelligence informing, and the anti-Castro plots that would have pointed to a major motive for Ruby killing Oswald. The House Select Committees admitted these facts about CIA plots and Jack Ruby, listed its suspects as Santo Trafficante, Carlos Marcello, Jimmy Hoffa, and the CIA-directed Cuban exiles, and then did nothing to follow up important leads developed by its own staff.

The Warren Commission did not investigate a pattern of disinformation developed immediately after the JFK assassination attempting to implicate Fidel Castro in the murder of JFK. The House Select Committee ignored substantial evidence that the individuals involved had long-standing CIA links.

The Warren Commission discounted a dozen sightings of a man (or men) who looked like, acted like, and sometimes used the name of Lee Harvey Oswald who could not have been Oswald in the two months before the assassination. The House Select Committee ignored still more suspicious Second Oswald sightings.

The Warren Commission was unable to establish that Oswald ordered, took delivery of, possessed, practiced with, carried to the Texas School Book Depository, and fired a rifle from that building on November 22, 1963. The Commission's paraffin tests of Oswald's face and hands were inconclusive. The House Select Committee on Assassinations ignored the Commission's failures, relying on the Commission's broken chain of rifle evidence.

The Warren Commission was unable to establish a definitive shape for the "sniper's nest" and did not prove the value of the earliest-known box arrangement at that sixth floor Texas School Book Depository window. The Commission also ignored the half-open window, making the firing of a weapon at the motorcade and striking Kennedy and Connally difficult (if not impossible). The House Select Committee failed to resolve these problems.

The Warren Commission refused to examine either the Bethesda autopsy photos or x-rays. Instead, its medical witnesses used admittedly inaccurate drawings to represent JFK's wounds.

The Warren Commission placed JFK's back wound higher than Commission testimony and FBI evidence located it in order to argue a back-to-front and high-to-low trajectory for that wound. The House Select Committee's medical panel apparently recognized the Commission's faulty evidence and offered one trajectory but with JFK in three different positions. The only position of the three consistent with the available evidence was a transit through JFK from back to front but from low to high. The House Select Committee did not explain this impossible trajectory as consistent with a round fired from the Depository's sixth floor.

The alleged transit of CE 399 through JFK's body (accepted by both the Warren Commission and the House Select Committee) is a speculation without credible forensic evidence. That this bullet also caused all of Connally's wounds is a fiction.

The earliest Parkland Hospital descriptions of President Kennedy's wounds and the later Bethesda autopsy descriptions of those wounds seriously contradict each other. The Bethesda autopsy description does not match the Parkland doctors' observations, and the Bethesda autopsy photos and x-rays do not match either each other or the official Naval autopsy report. The Warren Commission refused to look at the autopsy photos and x-rays, using less than accurate drawings of the JFK wounds, thereby overlooking the medical contradictions between Parkland and Bethesda. The House Select Committee on Assassinations recognized the Warren Commission's medical problems but did not resolve these contradictions.

Who Killed JFK, RFK, MLK?

You Can Help Solve the Mystery

Thirty years after the Warren Commission declared that Lee Harvey Oswald was the lone assassin of President Kennedy, 86% of the American people believe that there was a conspiracy. A national organization, the **Coalition on Political Assassinations**, grew out of the Call to Action meetings at last year's ASK Conference, uniting organizations and researchers, and providing a watchful eye, a voice and a lobby in Washington, DC. We have already succeeded by working to keep the Records Review Board alive and funded, getting national and local press attention, and influencing Congress concerning these cases. The Coalition is working for full disclosure of all government records in this unsolved murder case, and joining the efforts of the best medical, forensic, radiological, ballistic and criminalistic experts, as well as researchers, scholars and criminal detectives in a search for the truth. Our aim is to free the files and reclaim our history.

We believe that:

- *John F. Kennedy was killed by more than one gunman, the result of a conspiracy.*
- *All previous government investigations of this murder were flawed.*
- *Serious questions remain in other assassinations, including the deaths of Robert Kennedy and Martin Luther King, Jr.*
- *All records relating to these assassinations should be released to the public.*

Join the Coalition:

- *Receive our newsletter with the latest information on release of files, new evidence, and analysis by experts and major authors.*
- *Join our Working Panels, set up to investigate medical, criminalistic and photographic evidence.*
- *Be part of our efforts to serve as a public watchdog on release of files.*
- *Help us tell the American people the real history of political assassinations in the United States.*

"Three Decades of Doubt," our national conference was held recently in Washington, DC, with professional presentations of new evidence and analysis by over 40 leading researchers, authors, medical and scientific experts and scholars, who have studied the conspiracy involved in these assassinations. It has been called "the best conference on JFK ever," and includes the most recent developments on other murders. You can see the presentations, and testimony before the Assassination Records Review Board, by ordering our conference videotapes. You can also purchase a set of the papers they presented (\$10).

Visit the Coalition on Political Assassinations table at the ASK conference and become a member (\$35 annual, through 1995), or write to us and join our efforts to open and resolve the murders that have deeply affected our country for the last three decades.
