E.E. 11/26/76 postseript

 this story but eeveral uight ago he dic phoue om a JIX story, to ank if I ksew a asme zot in the etory.

The roason for thie postacript in that tive in the second apook isak of what is covered by my long-btanding sad ipmored FoiA requests. The firnt was the Pont atory of $11 / 13$ alleging a seoret "onver momo. It if a nom-etory. ealer told we they are not yroud of it now, a stamement not supported by his today" a story.

Wifh the surveillwace I bave long had such as inclusive request with the CIh. So loag it is past thair claimed lago They triad to lwap it in uith my faclusive requast. I rejected this, sayiag I did not feat to wit uatil witever tine in the digtant future they would mitit to heviag completed whatever thay decided to revbew.

I knew of thene interompte. Vhen a friend filed an Lxadequate raqueet I backntoppod with sul adequate one although I had airasdy imoluise it. Because Schwoiker also knew and duantibing I mefe aeparate requact. I sald I weated it faater.

Hine also included the intereeption of Osmald's mail, certaln whom ho was in the US3n.

While I have mo may of kcaowing whether there mas any such converastion I do know that the thing is atteriy irrational.

The aubject of the $11 / 13$ lagk is an FBI rocord.
Jia telearaphed Levi $11 / 13$ and has had mo raupouse. Evan acknonlecigurset.
Earlier in effidevitd and beginning 9/16 and for eevoral days in $0 . \mathrm{A} .75$-1996 we woint isto this. We hed supervisory FOLA agaits on the stand and I testiflad. They have reviewod thase files three timas as of than without respoxding to my reguagts that
 I had a list of thene requestemade.

Thise is for your POLA knowlsdee. In mo oase hes the time of the cladried - and manufactured - backlog not pasaed with both agemeies and DJ.
