

Date 11/26/63

At 8:50 p.m., Mr. JAMES ROWLEY, Chief, United States Secret Service, gave to SA ELMER LEE TODD an envelope containing a bullet. This envelope and its contents were taken directly to the FBI Laboratory and delivered to SA ROBERT A. FRAZIER. The envelope was opened and initials of both SA TODD and FRAZIER were etched on the nose of the bullet for identification purposes.

Date 11/26/63

At approximately 3 p.m. on November 22, 1963, following the President's announced assassination, it was ascertained that Air Force One, the President's jet, was returning from Love Field, Dallas, Texas, flying the body back to Andrews Air Force Base, Camp Springs, Maryland. SAs FRANCIS X. O'NEILL, JR. and JAMES W. SIBERT proceeded to Andrews Air Force Base to handle any matters which would fall within the jurisdiction of the Federal Bureau of Investigation, inasmuch as it was anticipated that a large group of both military and civilian personnel assigned to the Base would congregate at Base Operations to witness the landing of this flight.

Lt. Col. ROBERT T. BEST, Director of Law Enforcement and Security, advised the President's plane would arrive at 5:25 p.m. Subsequently, Col. BEST advised that the plane would arrive at 6:05 p.m.

At approximately 5:55 p.m. agents were advised through the Hyattsville Resident Agency that the Bureau had instructed that the agents accompany the body to the National Naval Medical Center, Bethesda, Maryland, to stay with the body and to obtain bullets reportedly in the President's body.

Immediately agents contacted Mr. JAMES ROWLEY, the Director of the U. S. Secret Service, identified themselves and made Mr. ROWLEY aware of our aforementioned instruction. Immediately following the plane's landing, Mr. ROWLEY arranged seating for Bureau agents in the third car of the White House motorcade which followed the ambulance containing the President's body to the Naval Medical Center, Bethesda, Maryland.

On arrival at the Medical Center, the ambulance stopped in front of the main entrance, at which time Mrs. JACQUELINE KENNEDY and Attorney General ROBERT KENNEDY embarked from the ambulance and entered the building. The ambulance was thereafter driven around to the rear entrance where the President's body was removed and taken into an autopsy room. Bureau agents assisted in the moving of the casket to the autopsy room. A tight security was immediately placed around the autopsy room by the Naval facility and the U. S. Secret Service. Bureau agents made contact with Mr. ROY KELLERMAN, the Assistant Secret Service Agent in Charge of the White House Detail, and advised him of the Bureau's interest in this matter.

He advised that he had already received instructions from Director ROWLEY as to the presence of Bureau agents. It will be noted that aforementioned Bureau agents, Mr. ROY KELLERMAN, Mr. WILLIAM GREER and Mr. WILLIAM O'LEARY, Secret Service agents, were the only personnel other than medical personnel present during the autopsy.

The following individuals attended the autopsy:

Adm. C. B. HOLLOWAY, U. S. Navy, Commanding Officer of the U. S. Naval Medical Center, Bethesda;

Adm. BERKLEY, U. S. Navy, the President's personal physician;

Commander JAMES J. HUMES, Chief Pathologist, Bethesda Naval Hospital, who conducted autopsy;

Capt. JAMES H. STONER, JR., Commanding Officer, U. S. Naval Medical School, Bethesda;

Mr. JOHN T. STRINGER, JR., Medical photographer;

JAMES H. FBERSOLE;

LLOYD E. RAHBS;

J. T. BOZWELL;

J. G. RUDNICKI;

PAUL K. O'CONNOR;

J. C. JENKINS;

JERROL F. CRESTER;

EDWARD F. REED;

JAMES METZLER.

During the course of the autopsy, Lt. Col. P. FINCK, U. S. Army Armed Forces Institute of Pathology, arrived to assist Commander HUMES in the autopsy. In addition, Lt. Cmdr. GREGG CROSS and Captain DAVID OSBORNE, Chief of Surgery, entered the autopsy room.

Major General WEHLE, Commanding Officer of U. S. Military District, Washington, D.C., entered the autopsy room to ascertain from the Secret Service arrangements concerning the

3

transportation of the President's body back to the White House. AMC CHESTER H. BOYERS, U. S. Navy, visited the autopsy room during the final stages of such to type receipts given by FBI and Secret Service for items obtained.

At the termination of the autopsy, the following personnel from Gawler's Funeral Home entered the autopsy room to prepare the President's body for burial:

JOHN VAN HAESEN
EDWIN STROBLE
THOMAS ROBINSON
Mr. HAGEN

Brigadier General GODFREY McHUGH, Air Force Military Aide to the President, was also present, as was Dr. GEORGE BAKEMAN, U. S. Navy.

Arrangements were made for the performance of the autopsy by the U. S. Navy and Secret Service.

The President's body was removed from the casket in which it had been transported and was placed on the autopsy table, at which time the complete body was wrapped in a sheet and the head area contained an additional wrapping which was saturated with blood. Following the removal of the wrapping, it was ascertained that the President's clothing had been removed and it was also apparent that a tracheotomy had been performed, as well as surgery of the head area, namely, in the top of the skull. All personnel with the exception of medical officers needed in the taking of photographs and X-Rays were requested to leave the autopsy room and remain in an adjacent room.

Upon completion of X-Rays and photographs, the first incision was made at 8:15 p.m. X-Rays of the brain area which were developed and returned to the autopsy room disclosed a path of a missile which appeared to enter the back of the skull and the path of the disintegrated fragments could be observed along the right side of the skull. The largest section of this missile as portrayed by X-Ray appeared to be behind the right frontal sinus. The next largest fragment appeared to be at the rear of the skull at the juncture of the skull bone.

The Chief Pathologist advised approximately 40 particles of disintegrated bullet and smudges indicated that the projectile had fragmented while passing through the skull region.

**

EA 89-30
FXO/JWS:df1
4

During the autopsy inspection of the area of the brain, two fragments of metal were removed by Dr. HUMES, namely, one fragment measuring 7 x 2 millimeters, which was removed from the right side of the brain. An additional fragment of metal measuring 1 x 3 millimeters was also removed from this area, both of which were placed in a glass jar containing a black metal top which were thereafter marked for identification and following the signing of a proper receipt were transported by Bureau agents to the FBI Laboratory.

During the latter stages of this autopsy, Dr. HUMES located an opening which appeared to be a bullet hole which was below the shoulders and two inches to the right of the middle line of the spinal column.

This opening was probed by Dr. HUMES with the finger, at which time it was determined that the trajectory of the missile entering at this point had entered at a downward position of 45 to 60 degrees. Further probing determined that the distance travelled by this missile was a short distance inasmuch as the end of the opening could be felt with the finger.

Inasmuch as no complete bullet of any size could be located in the brain area and likewise no bullet could be located in the back or any other area of the body as determined by total body X-Rays and inspection revealing there was no point of exit, the individuals performing the autopsy were at a loss to explain why they could find no bullets.

A call was made by Bureau agents to the Firearms Section of the FBI Laboratory, at which time SA CHARLES L. KILLION advised that the Laboratory had received through Secret Service Agent RICHARD JOHNSON a bullet which had reportedly been found on a stretcher in the emergency room of Parkland Hospital, Dallas, Texas. This stretcher had also contained a stethoscope and pair of rubber gloves. Agent JOHNSON had advised the Laboratory that it had not been ascertained whether or not this was the stretcher which had been used to transport the body of President KENNEDY. Agent KILLION further described this bullet as pertaining to a 6.5 millimeter rifle which would be approximately a 25 caliber rifle and that this bullet consisted of a copper alloy full jacket.

Immediately following receipt of this information, this was made available to Dr. HUMES who advised that in his opinion this accounted for no bullet being located which had entered

**

5

the back region and that since external cardiac massage had been performed at Parkland Hospital, it was entirely possible that through such movement the bullet had worked its way back out of the point of entry and had fallen on the stretcher.

Also during the latter stages of the autopsy, a piece of the skull measuring 10 x 6.5 centimeters was brought to Dr. HUMES who was instructed that this had been removed from the President's skull. Immediately this section of skull was X-Rayed, at which time it was determined by Dr. HUMES that one corner of this section revealed minute metal particles and inspection of this same area disclosed a chipping of the top portion of this piece, both of which indicated that this had been the point of exit of the bullet entering the skull region.

On the basis of the latter two developments, Dr. HUMES stated that the pattern was clear that the one bullet had entered the President's back and had worked its way out of the body during external cardiac massage and that a second high velocity bullet had entered the rear of the skull and had fragmentized prior to exit through the top of the skull. He further pointed out that X-Rays had disclosed numerous fractures in the cranial area which he attributed to the force generated by the impact of the bullet in its passage through the brain area. He attributed the death of the President to a gunshot wound in the head.

The following is a complete listing of photographs and X-Rays taken by the medical authorities of the President's body. They were turned over to Mr. ROY KELLERMAN of the Secret Service. X-Rays were developed by the hospital, however, the photographs were delivered to Secret Service undeveloped:

- 11 X-Rays
- 22 4 x 5 color photographs
- 18 4 x 5 black and white photographs
- 1 roll of 120 film containing five exposures

Mr. KELLERMAN stated these items could be made available to the FBI upon request. The portion of the skull measuring 10 x 6.5 centimeters was maintained in the custody of Dr. HUMES who stated that it also could be made available for further examination. The two metal fragments removed from the brain area were hand carried by SAs SIBERT and O'NEILL to the FBI Laboratory immediately following the autopsy and were turned over to SA KURT FRAZIER.

OFFICE OF THE CHIEF
U. S. SECRET SERVICE

TREASURY DEPARTMENT
WASHINGTON 25, D. C.

CO-2-34030

Protective Research Section
November 26, 1963

Receipt is acknowledged this date, Nov. 26, 1963, of the following items from Dr. George G. Burkley:

One piece of bronze colored material inadvertently broken in transit from casket in which body was brought from Dallas.

One letter - Certificate of Death of John F. Kennedy - State of Texas - dated Nov. 22, 1963.

One carbon copy of letter dated November 26 from Commanding Officer, U. S. Medical School, concerning law and regulations regarding confidential nature of the events.

One receipt dated Nov. 22, 1963, for bed sheet, surgical drapes, and shroud used to cover the body in transit.

One receipt dated Nov. 22, 1963, regarding a carton of photographic film, undeveloped except for X-rays, delivered to PRS for safekeeping.

An original and six pink copies of Certificate of Death (Nav.Med.N)

One receipt from FBI for a missile removed during the examination of the body.

One letter from University of Texas South West Medical School including report from Dr. Clark and summary of their findings of treatment and examination of the President in the Dallas County Hospital. Said letter of transmittal states that three carbon copies have been retained in that area.

One copy of autopsy report and notes of the examining doctor which is described in letter of transmittal Nov. 25, 1963 by Dr. Gallaway.

Transmittal letter and 7 copies of the above item (autopsy report)

Authorization for post mortem examination signed by the Attorney General and dated Nov. 22, 1963.

Robert I. Bouck

1

Date 11/29/63

Mr. GERALD A. BEHN, Special Agent in Charge, White House Detail, United States Secret Service, was interviewed at his office and advised that during the President's visit to the State of Texas, then Vice President JOHNSON would always arrive at the next city to be visited ahead of the President and would join the party awaiting the President's arrival. This was accomplished by the use of two Jets; Air Force I, which carried the President; and Air Force II, carrying the Vice President. On departing from a city, Air Force I would first take off followed by Air Force II which would thereafter pass Air Force I in flight, cruising at a faster speed, thus allowing the Vice President to arrive prior to the President and be with the greeting party.

Mr. BEHN was questioned concerning the section of the President's skull, which was brought to the National Navy Medical Center at Bethesda, Maryland after the autopsy was in progress. He advised that this section, which was measured by the Doctor performing the autopsy as being 10 x 6.5 centimeters, was found in the Presidential car on the floor between the front and rear seats. He further related that two fragments of bullets had also been found in this vehicle in the front of the car and that the windshield had been cracked by the impact of one of these fragments.

BEHN was likewise questioned concerning the location of a bullet which had been found on a stretcher at Parkland Hospital in Dallas and which had been turned over by the Secret Service to an Agent of the Federal Bureau of Investigation for delivery to the FBI Laboratory. He stated that on learning of such a bullet being found at the Dallas Hospital he inquired of a group of his Agents who had returned from the Dallas trip on the night of November 22, 1963, and Secret Service Agent RICHARD JOHNSEN produced this bullet which had been handed to him by someone at the hospital who had stated that it was not known whether or not the President had been placed on the stretcher where the bullet was found.
