If you will pernicit yourself' to rucall wom of my warmings, you mey be able to see this woming's fost atory as a harbinger of what lies in ths intediate futuro. Whether or not there are othor such stoxias prior to it, othor deviopnente are alated for thia weok. Whoy are pussiblo and hivo cone to pass in the naw of the Senator. Without at least apgr val in hia name, it would not be posalible.
"Sxpert Says Doctors Eered On site of Jik's Wound", the headino says. Wh soathing as relatively amanli as nuococredrows the human head, an error of four inches? this is not now. I discovered it years ago and wanted you to bo awaro of it, as I did hr. Durke boions you. with doctors on "error" of thia magmitude? With a Eonsission stafied as tiat one it only "fadled to elardfy thnt point"?

All you ne difor continuing comiort in this matter is to porsunde yourself that "errox" wakes accuracy, undepondability ascures dependability, and filsohood is the newns of eatablishinj truth.

You w_ 11 rocognize it as not a now sontiment when I ropeat that I heto to think of the pain that may lie in the irusedate future for the semator and his faily. whetricr it will $b$ tila weak or whethor what i fens will even eventuate nortal camot forecust.

But if you bnow that the firnt critical oxandiation of the contracted material is schedulod for thin week, that ins, horsan has divon us a remarkable coincidenco in proserving wlence for four yoars and brealcing it in the incrocible way, and that he was, what the lost does not say, one of the lour experts with whom the fardly was neodleasly invoived in the panel rupert of four yoarn ano and in that he failed to aky that the "doctors errei", purhaps you can soe soas posaibilitiles.

I regret you have not seen fit to truat we to the extent of inforsing yourbolf. You or others ray sud enly need inforpation no whi not have it. Should. you change your mind or find this noed, I will be available. Fiv conditions ur unchanged: nutual proworvation of confidence. I expect to be gone for a fow houra Wednegday momine, p saibly biday aftemo $n$, but not for lonts any other days. If you have not checkec o out in the paet with others then purtisuns, there 2 mn 't wheh you ann do alone this line under current circunstancess. howover, you should be abio to roach Senator iathias, afthouch he is in Hiani, or purhapas his wife, or Sid kurlburt, who lenows me less well but may know mhat "tace" thinks. Whitortanatery, you aro all hug up in truat of judigement that is not and naver has beon indspondiont and that was formed by those who are panti pride.

I do hope that what can hapoen doean't, nuch as 1 fear it is tise design.
