SCHOOL OF MEDICINE
DEPARTMENT OF PATHOLOGY AND ONCOLOGY

June 28, 1969

Harold Weisberg, Esq.,
Route 8, Frederick, Maryland

Dear Harold:

Many thanks for your letters of 6/18/68 and 6/26/67 both of which arrived earlier this monrning.

I have finally obtained a copy of the regulations of the U.S.N. Medical Department and will send you Xerox copies of some of the appropriate pages Tuesday July 1. Study of these regulations reveals that there must exist a very vital document which is being suppressed and which is not suspected by anyone so far. I will tell you about it when I forward a preliminary copy of my brief on which we will spend considerable time in Topeka Monday 30.

Prints from the negatives showing the Hanky-Panky which Bernabei caught relative to the cartridge bases are the only thing lacking from the Archives. I will not ask for certification but instead accept or reject what they send me. I have rejected the prints they sent me from a negative they took from the book, the screen is quite obvious and apparent to all. As you say their failure to comply with my requests on this will arouse curiosity of the judge, to say the least.

I do not attempt to copyright any standard picture from the Archives which picture already exists. When I want a picture in a certain way I have our photographic department take it exactly as I want it and then I send this example to the Archives with the same green blotter background and millimeter rule and ask for a black-white negative and a 3 x 4 color transparancy together with a 35 mm ######## color transparancy and to return the ruler and green background. My personal check is enclosed. Under these circumstances the copyright lies with myself.

Included in the loss of weight of the bullets previously mentioned must be included anything that rubs off in the mattresses when it absorbs the thousand or more foot-pounds of energy.

Sincerely,
