

11/4/69

Dear John,

You will recall that you sent me the first page of the FBI lab report of 11/23/69 part of CD81b, I think, asked me to tell you the exhibit number, then wrote telling me not to bother.

I had already asked the Archives for a copy, because that first page looked like a different version than I recalled. I asked at that time that I be told what exhibit it is. Today I got my copy, without exhibit number. However, if Paul hasn't identified it for you, you can, readily, from his list of documents made into exhibits. This one is pp. 131-5, inc.

I suspect Dymond doesn't like you, after reading your N.O. testimony! He may even have learned a few things, like the best way to know the points of entrance and exit of a bullet! Good.

If Paul hasn't told you, there is no more N.O. testimony that interests him. Therefore, if you get any more transcripts, please send them directly to me. Likewise, if I get any, I'll see if you are interested. I do not expect any until after the election at the earliest.

I've been denied the memo of transfer again, and a few other things. In the course of doing it, I suspect they'll learn they put on paper what in retrospect they'll wish they hadn't.

They are getting over-confident, really careless. Or losing their cool. Or, as I look at it, making me an excellent record.

Best regards,

Harold Weisberg
