

12/12/69

Dear John,

As I told you I would, as soon as I returned I started to make a copy of 17H48 for you from the autopsy file, JFK 4-1. Lo and behold, they left this page out when they copied it for me. I had not noticed it. I was so familiar with it from CE 397, I guess it escaped my attention. Now not only did I staple this together on receipt, for what they sent me was a large bunch of loose papers, But I have kept it in a separate file since. I have checked everywhere to see if I have it, even the unpublished appendix to ROBT MORTON, and I do not have that page. So, I immediately wrote and will mail when I mail this asking for a copy for you and one for me.

In today's mail I have a letter from Dick which I also go into in the enclosed letter to Rhoads. These wretched people no longer try and hide their interferences with research. I imagine it has been two months since I made that request, I have written them about it, spoken to them repeatedly, and Dick has written. Johnson can lay his hands on that picture immediately. It is the one I showed you in Silver Spring that almost blew your mind.

If you will be kind enough to pay Morey for me and let me know the cost, I'll repay you. As you say, making both sets of prints at the same time should reduce cost considerably.

Now I've got to rush a letter to Dick in case I can get to mail it tonight. I've already mailed one letter to you today. It should have gotten it with the enclosed affidavit to Betzner.

Hurriedly,

Harold Weisberg
