Privacy claims, arbitrariness and capriciousness in

Recently I believe I referred to copies that were being made for you relating to widespread distribution of the allegations of sick people that there was a ring of neo-fascists in New Orleans including the "hardcore".

I also made reference to disclosure when some people were "mental cases."

While I do not believe that such disclosure is inappropriate in historical cases or under the FOIA's 5/5/77 guidelines I do include the records from two files so that you can compare evidence of the alleged privacy concerns, as for FOIA those concerns have been well publicized and others where there is withholding.

I believe that if allegations of this nature are disclosed nothing can properly be withheld.

Differences between attached 44-157XX-472 and Not Reported from 100-82555, the same record, include routing and ~~status~~ distribution and the initials of those who read the record and then initialed it.
