Generally, I am not a student of what was being said for you relating to widespread distribution of the allegation of such people that there was a ring of associates in the White House.

Also, the reference to "leakage" and the "people were 'leaked' cases." This is a very important and delicate issue in any system in historical cases or under the rule of law. It is important to include the necessary facts to show that you are a competent witness of this alleged privacy concern, and for the those matters have been well publicized and others share that is critical.

I believe that if allegations of this nature are disclosed publicly, they may be of value.

Reference to your document 68-10314-10, and not reported from 100-3250, the case number, in this context, was ~~initial~~ distribution of the initials of the case and the record on this initiated it.
