

5/6/68

Dear Dick,

In response, I presume you are familiar with Jerry's testimony, 54258, and the exhibits, 12H44-C. Hope you can do something with him, at least find out if it is for real. Jerry is doing very well in Dallas when everything is considered.

And it will be excellent if you can get a Canadian committee going. Write Steve Burton, 3311, Box 150, RR 300 Westford, Mass, 01082. Fax 136 and 3082.

What is essential is what you point out about the error. The doesn't have to show trajectories (and I've forgotten what I learned in ROTC) to see it. It is just plain common sense.

I have made a copy of your letter and am sending it to Dr. John Nichols, Kansas City, who has done his own excellent work in the field, including by far the best with the weapon. He has conceived and done what occurred to no one else and in addition, is an expert psychologist. If you hear anything you will know why. He has, in addition to his skills, the weapon with the right sight, the equipment with which to measure, the equipment with which to photograph, and the mind that all require.

Excuse the haste.

Best regards,

Sincerely,
