Dear Hick,
Tour valueble 1 thers of $9 / 30$ shi $10 / 1$ errived today, with a nice one Irom Roffina you have by now seen, with enelosures I return to him todey. His are velueble documents. I am satisfied the Hoover ststement on when the weifing pisa done ie (if not to hie mo ledge) s lie. It is not my recoilection of Prazior's teatimony.

There is e rergercoble orallel betwen sons or the thitas you seys and wiat I Whs ex laininct to Fionry Ifpana, who apen the pest two days here.

I will be in 价 Fecnecday. I ezaect to be able to get to the Archives. I will then order a cony of my diciure you ment and have it sent to you ond one of $R^{\dagger}$ s for mysolf. I will better undorstand any comporisons then snd you vill hive whet you need os rapidly es pozelble on at less cost then shiftiug one beck and forth my mail.

On the loss of bese metsl, I dieegrec to this extent (I actu:lly gree Witi the conclusion): I think, from my picturo, it is poseiblo to urgue the loss of $a$ bit as much as 2mm in maximum dimension.

Gn your requent, heve gou forgetton tiegt thile the empo ${ }^{2}$.heve is military, it is rot Vestern? Eence I cencot sent you iestern.

I ari in ontive accord on the importence ot Eetting Frazier the stand. If they iod jone what I enticipeted in N.O., whot I is d ocught to prepare thom for, this woull now be seadenic. How Vor, with bis togtiony thave, any ne testimony from hiy with bo of the bighost siantiflonce. I aoubt very much ho will perjur hinself on the stand. I do not $k$ ow whether pretrisl depooitinns nom nossibl in such a suit. I Ecpe they are? Tiey are the enuivalout of testimony, and perjury in then is no less a crimo.

Ii ain in delaying copying the testimony until ne recelyes $\mathrm{F}_{\mathrm{i}} \mathrm{c} \mathrm{k}^{\prime} \mathrm{s}$. John had not yet sont it wian lasi ${ }^{+}$hard.
$U_{n}$ Lempsay, plesso use a taps recorder and just let his remble, without eflret to prevent digressions, leter repedting as a test of sccurecy and of his complateness of recsil. Go into Haiti, recent, Hisll's travels, then end to where, Witi whom, in wat kind of cer, with what state of registration, what vources of the loot witu waich he returned, etc. Also, th erreste, includine Kipll's 20/65 by customs, etc. I usy hove the picture you want. If you get s negetive from Miami, $y_{\text {h }}$ ve a fine lad there I can send to the 11 brary or the newspaper morgue or both. Young enouzh to be a student, but good.

Tine of beck round: About 2287 is out of place ot the Archives. I heve ben trging since 106s to cot them th rastore it fen aiter zatis 7.313 to its proper risce. 2283 or 284 is du liested in tho hesrines, the second beine misaing entirely. At about this point there is detactable, if you look st the movies cerefully, preferably in slow notion or backeard or both, a short, sharp motion of the upper torse and forward. if we assume, as I think you do slso ind as I gm confldent is justifled, that JFK's nervous reactions mere already blocked by the shock of having been hit, there would ke no visible nervous reaction, like the reaching of a hand. There is no doubt there is such a forward motion, upper pert boc
nterior neck: Ie there eny ryason to bolieve ony of tha zounds vere cused by militery ant o? I do not gni nevir have belicved this. The Comisaion postolates this, but you mey racall in Ity I 80 throurh the searca inp tha gource sud its abendenint on readeds were diaccvored is greet quantity.

This rerning Ifpmn raised tie question of thi \%ound yu asced if it were $n$ possible to detmine whather it was of ontry or exic by teste. I told hi tissue ghoull dave beon removed fro both holes for auch testing. The description + have him is less complete then yours, but I aid tell hi:a there should be burning on searing on the entry bole, resdily seen undar tha nierogcoro. I tien added that waile the panel report or the proctocol may at tribute such removed
 just speculation and preaunes real dishonsaty, ot eimo error. Et Core the exemination was complat, they tnem of 399 and it as incumbent upon tiom to remove tiscue froo to th Pront and rear non-fatols for auch testing. inio thy well heve ceon after the pletures vere mede. I an inclined to believe they ild all such things only nfter the pix rere teren, for they were, for the rost pert, token in esiately. I'A believe all axtasior shots ware taken $b$ fore s kife was used, with organs, atic., during the expmiretion.

Sprague's pictures: sounde like the ones + icve. There is on edditionel ong in the heeringe of this eecuence. Excurt for the size, 1 sgres with your blief it is irgin, but bullat, ani trieh withow eacceas to dilence in on this. However, that locetion is other thas the one pseciliec in the ini reports if RIf os tae Harier find. - heve asked Gary to caeck taits in woilas it de ean get Harper and get him to talk. That ifeatificetion, as I recall it, was $2 b \mathrm{ft}$, south of 4315 . I lack the mowledge to dispute your belief the Iragmont iad to go in tre direction of the bullet, but is ppyears the fiecs of elull did not and i seem to recoll contrary opinion irom Pinck in his testimony. On tiis and tce bruising of the upper cagat I cen find na cocricmation in Z. it, twe same $i=1$, $I$ cen offer no contrary exmlenetion. Rameater, how ver, esp. in eseeaging inclellena's tost., that tize slit we traneverse. erry tola me o: trit ith anye price.

Now that I fonow ymi are on artist (es your fine sketches shoula heve told me earliar', let the tell you wat I wonted to get done ofth Z199-205. I want to meke
 I think the boet wey ould be to meko allios ard groject tom. I'd like them in diffierent coloris end mith differemt solik and spoken linos, so they cua be superimposed (as on tracing paper) ond photagraphed separetely also. Whyrpose is to better illustrate what I say in WiII, that he hei teken ins wivture by z202 ant had begun to welk awoy. II you make slides, i'd gppreciate a duplicate set so I can get another artist to do tad same tuing, for in some areas there will be a lack of clerity and it will be move persuasive if two indopendently come up ith the same thing. It will tleo tend to show error, the possibility of wisk may bu high.

I hope you approve my letter to Rofmon. $\perp_{f}$ be bos beaun te cuestion his own conclusion, this is a yond time for hin to test tifm gaginst evidence of which he is not aware. Do not worry about mney, etc, for our situption is so bad e littla worse is unfelt. Beaides, you chould deduct the cost of the slides, etc.

No ti:e for more. Tant tragke out olne nail. In wt to return f's staff the dey of receit, which 1 tolleve he will telce as $n$ gien of intent, tiso fhe ipvitstion. I presume you toil him our rork conflmesoover on that porticular dent. I II let hi" duplicate here is te doubts. Nany thanks. This exhenge of ileas is very helpful, even in the ereas of minor disegreement.
