Dear Ms. Christensen,

What few people can have any reason to believe is the grim fact, that because the assassination was never officially investigated there are no leads to be followed by private citizens. This also makes it close to inevitable that much as we all would like it, the crime will never be solved. My new book, NEVER AGAIN!, to be published this coming September, goes into that with the official records relating to this that are among those I obtained by a dozen FOIA lawsuits.

My work comes entirely from the official evidence what was suppressed or ~~read~~<sup>lied</sup> about.

There is ~~no~~<sup>those</sup> theorizing of conspiracies. That deceives and misleads the people. And that works, which really are of fiction, can be made attractive because they are not restrained by reality. My work proves that there was a conspiracy but it does not deceive truth-seeking people by pretending to solve the crime.

You say you do not understand how the media was so deceived. I think it deceived ~~itself~~ itself, not wanting the truth. Having deceived itself rather than questioning at the time of the crime it is not about to confess now and <sup>instead</sup> perpetuates the falsehoods.

My age and health require early retirement so I do not see the TV specials. I do not know which interview Kurtis used or by whom but I do not recall being interviewed by him.

We do live at the base of a mountain and we also believe it is lovely.

It is frustrating to know that such a crime, one of its awful consequences, can be unsolved but I think it is perhaps more frustrating to swallow the various contrived theories for which "solutions" also are contrived. I think it is better to understand the truth and to hope that it can come to be understood well enough so that, as I titled that <sup>book,</sup> it NEVER AGAIN! can happen in our country and the government is forced to admit the truth.

Thanks and best wishes,

Harold M. Eisey

Dear Mr. + Mrs. Weisberg  
I am so thoroughly appalled by our justice system. In watching the Mendenhall Bros. trial on Court TV, plus other trials I've watched, I wonder how anyone could get a fair hearing. Lawyers argue over the evidence, pro + con, and the juries never hear crucial facts in the cases. But, at least, most accused people do get a hearing.

I'm anxious to receive your book, although that isn't my reason for writing to you. I feel so grieved that the JFK matter has not been resolved. I've read so many books on the subject, my favorites being "High Treason" + "Conspiracy"; the dumbest one, "Fatal Error". Anthony Summers' suggestion that J.D. Tippett was shot by someone in his love triangle was interesting. I don't know if it was followed up or hushed up.

This is a strong statement, but I feel that J. Edgar Hoover was a national disgrace. The U.S. has a great government, but ran by some very unscrupulous people.

I don't understand how these same people have managed to fool the news media. Maybe if the Marine Corps had labeled their target practitioners "good hit" + "poor shot" that would have helped, instead of "marksman" + "sharp-shooters."

I'm inclined to believe that the mafia supplied the hit, working with the FBI - CIA, who supplied the cover-up. LTBJ, as a witness to the killing, knew he had to agree or he might not survive. I do think Ruby was inoculated with live cancer cells, the same as Martha Mitchell was.

After seeing Mr. Weisberg on Bill Kurtis' TV show, and the picture of your lovely home on it's own "grassy knoll" I feel quite at ease writing to you. It's so frustrating to want to know + be so thwarted, maybe we should all just go over to George Will's camp.

My best wishes  
June Christensen
