Frederick, MD 21702

Dear Kathy,

As I remember it, when you wrote you said that you were having copier trouble and that among what you'd be sending me is copies of Waybright memos.

I write to ask that if the copier trouble continues if you would please have the copying done commercially and tell me the cost so I can refund it.

They might help me identify the disappearance of more than I know is missing.

If I did not tell you, one file that almost nobody else knew about and ~~was~~ where nobody else ever worked was about two inches thick. I am reminded of that by writing on that subject without what I had in that file.

On another subject in which Livingstone had no interest and nobody of whom I know other than Lifton did very much is missing and that also was a file in which nobody else ever worked or expressed any interest.

That was an entirely different set of files than anyone ever worked in, not what I got by FOIA cases.

I never asked you how you got them but if it is not confidential I'd like to know.

The turn in the weather here is what you never experience there. When I retired last night I wondered if the snow would continue or if it would be too icy for me to leave before daylight for my walking, blood-testing, physical therapy and today a dental appointment, the latter the last, at 8:50 a.m.

Strange hours, huh?

Thanks and best to you all,

Harold

Temperature 35°
