

Part 1

CBS: Page 5, "Incidentally, the search ~~of~~ of the book depository for curtain rods was 'negative'"

Fact: There was no search of the building for curtain rods. WW 22 reveals that not until August 31, 1964, did the Commission ask the Dallas FBI to ask Roy Truly, building manager, "if he knows of any curtain rods being found in the TSED building after November 22, 1963". Also, ~~what~~ "after" ~~November 22~~ *November 22? why not on any found that day?*

CBS: Page 6, "Despite the dispute about just how he carried the package, the reasonable answer to this question is that he did take a rifle to the Book Depository Building"

Fact: Aside from the quibbling CBS language, that he took "a rifle" when the only rifle in the entire world at issue was the Mannlicher-Carcano C-2766, here CBS flies into the face of 100% of the evidence. It also ignored the testimony of the only man in the world who saw Oswald enter the building, Jack Dougherty (WW19) who testified, "positively he had nothing in his hands". *CBS does not mention him.*

CBS: Pages 6-9, "Despite these discrepancies, his co-workers knew and certainly saw Oswald. The CBS News answer: ~~is~~ Oswald was in the Book Depository Building when the shots were fired, most probably on the sixth floor."

Fact: *the C2766*  
This again is a quibble. The essential conclusion is that Oswald was in that sixth-floor window with a rifle in his hands, and all the credible evidence is to the contrary. If he was in the building and was not there, he was also innocent. The testimony quoted by CBS is exhaustively dealt with only and was first in the first two WHITEWASH books, which are not mentioned. The quoted testimony of the three Negroes is disputed by the incontrovertible evidence of the suppressed Hughes film, which CBS also suppressed (PW278-80), which shows they were not where they testified they were, that the Dillard picture was taken later than the Report and CBS says, and that, at the critical moment of the actual assassination, there was neither a man nor a rifle in that window. Further, CBS suppressed ~~the~~ *of Oswald* proof that Oswald was then on the first floor, as did the Commission, although it had it, having asked me for it.

CBS: Page 9, "...three shells, later identified as fired from Oswald's rifle, were found 42 minutes after the shots..."

Fact: These shells were not proved to have been used in the assassination, the key thing CBS omits. It says they were "fired from Oswald's rifle", but when: There is pertinent evidence bearing on this suppressed from the Report (WW28). It is from J. Edgar Hoover and is that these shells had been fired previously on at least one occasion, and included the markings on another rifle, on the live shell found in the rifle. To add to this suppression, as CBS does, the fact of the finding of the shells 42 minutes later and of the rifle men minutes after that, is to try and lend an air of authenticity to its misrepresentation, for there is no evidence that the shells were used at that moment and in the assassination. CBS also suppressed the evidence that, when the opportunity to tie the bullet and the fragments to the assassination by means of the residues on them, ~~existed~~, the residues were wiped off the bullet and neither the FBI on its own nor the Commission did anything about it (WW163). *DID NOT ANALYZE WHAT REMAINED OF THESE RESIDUES, THE FBI AND THE COMMISSION SUPPRESSED THE SPECTROGRAPHIC ANALYSIS BY WHICH THE BULLET & THE FRAGMENTS COULD HAVE BEEN CONNECTED WITH THE ASSASSINATION. CBS SUPPRESSED THIS UNPREDOMINANT SUPPRESSION, OF WHICH IT KNEW.*

2

THERE IS NO SUCH EVIDENCE

This makes the CBS "conclusion" on page 11 more dishonest. It reads, "From the ballistics evidence it seems that the answer to the question of whether Oswald's rifle was fired from the building is yes". Without "concluding" that Oswald was in the window, and knowing it could not, CBS accomplished the planting of this misinformation in the minds of its audience with semantics. It then said, "...it appears that Oswald had the opportunity and the murder weapon", which neither it nor the Commission proved. The suppressed and ignored evidence is to the contrary.

CBS: "...the critics argue that Lee Harvey Oswald could not have fired his rifle fast enough or accurately enough to be the ~~sole~~ sole assassin.... How many shots were fired...how long did it take to fire them?"(page 11). The conclusions flowing from this are (page 14), "From our own tests we were convinced that a rifle like Oswald's could be fired in 5.6 seconds or less, and with reasonable accuracy..."(page 14). Part of the basis for this erroneous conclusion is that "We have shown that the Zapruder camera was quite possibly running slower than the Commission thought"(page 20).

*and quite in material*

Fact: The last statement is a plain, unalloyed lie. The ~~best~~ best that can be said for what CBS said it showed is that other ~~CBS~~ cameras of the same make could run slower. It did not in any way address ~~the~~ tests of the particular camera Zapruder sued, the only ~~one~~ <sup>thing</sup> that is pertinent, ~~by~~ both the FBI and Bell ~~and~~ Howell, ~~which~~ agree that the camera could not have run slower than a little more than 18 frames per second.

t

Entirely immaterial is what others could do with a rifle like Oswald's (and here CBS, like the Commission before it, failed to show that this rifle was, at the time of the assassination, Oswald's and in his possession). Oswald was "a rather poor shot", according to the Commandant of the Marine Corps (WW30). With that particular rifle, after it had been gone over, ~~the~~ the best shots the Commission could get, and under altered circumstances to make the shooting easier, could not duplicate the shooting attributed to him (WW26). THE CBS "TEST" is meaningless with a proper audience.

~~with~~

Moreover, The CBS test, rigged and dishonest as it was, proved the opposite of its conclusion. CBS refused to make public the results of its test, did not include them in its four hours of the broadcasts, and declined to give them to me. When they failed also to give them to Mrs. Sylvia Meagher, she wrote and told CBS exactly what its tests did prove, that its 11 experts, which Oswald was not, in 37 attempts, could not even be recorded in 17 cases because the bolt hung and the rifle either could not be fired in time or the bullet jammed and it could not be fired at all. Not a single expert CBS rifleman duplicated the shooting attributed to Oswald.

FRAMED - In order to make even this very poor record possible, CBS carefully surrounded the target, which was going in a predictable straight line and with no obstructions, like a blowing tree in the way, with a dark background to focus the eye on the target. The President was not this accommodating to his assassins.

CBS "...that hit (the first shot to hit the President) must have occurred somewhere between frames 210 and 225 of the Zapruder film. As to just where, we'll have some intriguing new evidence in a few minutes." (CBS)

Fact Both of these statements are false. The President was hit before frame 210, as the Commission's own evidence, ~~xxxxxx~~ totally ignored by CBS, proves (WWII, "Willis In His Own Name"). This "new" evidence? *That follows.*

CBS "It was first called to our attention by a distinguished physicist, Dr. Luis Alvarez, of the University of California at Berkley" *(page 12)*

*I published additional*

*himself @ Impact*

*in WHITEWASH II.*

Fact Identically this same information was first called to CBS attention by me in early 1966 (WW47), later ~~and in~~ additional detail (WWII) ~~WHO~~ at CBS: His predecessor (then his superior) and the executive producer of this series of shows, Leslie Midgely, repeated in May 1966 thereafter, to a number of other CBS news personnel, including those who worked on this series.

*and*

*some*

What is this "new evidence":

CBS: "Wyckoff:...in frame 190...something must have happened to Mr. Zapruder when he was --something must have startled him when he was holding his camera...and he jumped a little bit with the camera." (Pages 16-7)

*WHITE WASH PAGE 47:*

Fact: (WW47) "Beginning with Frame 190, this suddenly becomes fuzzy. Nothing had changed - the exposure was the same...As any amateur photographer knows, this clearly means that the change was in Zapruder. He was no longer holding the camera still. The slight motion imparted to the camera by his emotions at what he ~~had~~ saw...only reasonable explanation. ..."

*(Page 17)*

*1792.13*

And exactly the same thing is true of Frames 227 and WHITEWASH II (221).

But at this point, CBS pretends there were but three such fuzzy spots in the Zapruder film, which, it says, means three shots were fired. It has not answered my questions, why it did not also report what it knew, that there were a half-dozen such spots in the Zapruder film, and did this not mean that a half dozen shots were fired if the CBS argument is valid for three:

CBS: The Zapruder film "serves as a clock. If we know the exact speed the clock was running...possible to determine not only how many shots were fired, but the amount of time between them...If the time between the shots was less than the time necessary to operate Oswald's cheap bolt action rifle,,, then ~~we~~ obviously ~~he~~ was not the sole assassin" (Page 12)... But if the clock was not right...the <sup>time</sup> span of the shots ...would be affected. Curiously, most of the critics ~~then~~ themselves accept the 18.3 speed without a question - except one, who insists it was running at 24 frames, as could have happened if the control had been depressed. So, we decided to see if we could clock the clock..." (Page 19).

*EARLIER AND COPYRATED WORK THAT IT*

*AS ADDITIONAL PROOF*

Fact: I am that one critic, and this is not exactly what I say (WWII 180, 183-4). However, this also serves to prove that CBS knew about my work attributed to Alvarez and Wyckoff, for it also is in this book. What I actually said is that the FBI proved there was a 30% error between the actual Zapruder film, projected at 18 frames a second, and its own crime re-enactment ~~with~~ ~~that~~ camera at the same speed, that the actual film showed 30% less time required for the assassination than the Commission said, and that this could exactly be accounted for if the camera were on slow motion at 24 fps. I then produced an FBI December 4, 1973 report, suppressed by the Commission and CBS, in which Zapruder is quoted as saying just this.)

*So, CBS suppressed this proof of a 30% error, proving there was less time, because it was determined to present its own misrepresentation. Their ~~more~~ was more time.*

So, CBS "clocked the clock". How? In not a single case at the slow-motion setting! They did this ~~with~~ with all five of the cameras "tested". But all of this "testing" was deception, for the only real speed is that of the real, the only camera used by Zapruder. There were variations of up to 25% between the cameras tested. From this fraudulent base, CBS concluded, in the words of the "scientist" Wyckoff, "they could have had" (more than one Oswald) up to eight and thirty-five hundredths of a second-which is a

*additional and calculated credit in all acceptance*

pretty long time". *(It is still a very short time)*

Aside from the fraud in pretending to test the camera at slow-motion, which CBS did not, it is plain trickery to pretend that because another camera required more time, Zapruder's also did, a fact previously disproved by multiple testing by both the FBI and the manufacturer, Bell & Howell. From this CBS concluded, "We have shown that the Zapruder camera was quite possibly running slower than the Commission thought" (page 20). It is not possible to exaggerate the dishonesty of this "conclusion".

Comment: There is no CBS "conclusion" contrary to the Commission's that CBS did not first read in WHITEWASH, which not only CBS, but this same executive Producer, ~~did not first read~~ read. It is because Midgley's former superior, Palmer Williams, was so impressed by WHITEWASH that he asked me if he could keep it longer so he could give it to Midgley to read. Its other conclusions, on the speed of the camera (which it also got from me) and "that ~~it~~ a Mannlicher-Carcano rifle can be fired more rapidly and accurately than the Commission believed" (page 20) are false and invalid, ~~and~~ in any event, CBS did not show that ~~it~~ a Mannlicher-Carcano (which is not the question at all, but this Mannlicher-Carcano to the exclusions of all others) could be fired "more accurately than the Commission believed". It proved the opposite.

CBS also reached "conclusions" on what it termed "secondary questions". In each case, its "conclusions" are based on no fact, were not, at all addressed, or are contrary to its own evidence.

CBS With this perlude, it is not surprising that CBS found it necessary to repeat what appears to have been a carefully sponsored lie, also spread at the same time by the Associated Press and others: "The Warren Commission... did not state that Oswald was the only killer" *(page 21)*.

Fact: The very first chapter of the Report, designed to double as a press release, for which it was, actually, used, is entitled "Summary and Conclusions". Under the subheading "Conclusions", the fourth is this simple, direct, unequivocal sentence: "The shots which killed President Kennedy and wounded Governor Connally were fired by Lee Harvey Oswald." (R19) And, forgetting its initial ~~and~~ lie, CBS concluded its final show of this series by telling the truth about this. There (on p. 0) it said:
