

CBS 11/25/75 10-11 w tup

Cable and report new information - Rather given as fact  
The use of F&L & Lto - "We tried to give ourselves every  
chance to conclude that the WC was wrong" but couldn't  
"but us now we've had evidence"

False representation of how they were  
gives view of Lto shooting witnesses to point & distance  
for lawyer to help as W.C. various  
W.C. & ID - applying as typical of unit in. 20  
Area medical here

Miss how was Lto come given on  
Shows left of body chest to waist only & has Truck by rail  
as "two of the most respected critics"  
Conclusion of your WC - could Lto have done the shooting in  
Lto in prime allowed? Use of 2, 1st between 210 & 215  
Lto sharpshooter in training  
Was old form of reversed meter at special target straight  
Track

Claimed more killing than W.C. doesn't refer to actual  
results - from that failed - a complete shell of their  
shorter with that of W.C.

Single-bullet theory  
use old Truck film on head shot from front. Then  
grains & this with both as example of "theater"

Here - head shot from front & particles going to front  
Higher film - 1 tell found movement in on film record a frame.  
CBS film - all shots came from behind

Weston says all shots from behind - asked only about & refer  
only to skull which CBS claims its no proof and  
discovery

2)

Belin to claim he had to struggle bullet theory because had only  
Frs. 210-240 pm JBC to the hit. Use (old) film on Tunkra when  
man hit. Use 2 suggests will be fiction.

Then use of Olivier to say possible because of low velocity in  
of F1's mark & in JBC  
Text does not refer to all one bullet has to be done not being  
duplicated in CBS test.

"our judgment" possible  
Weight. There is second shot from different JBC window  
but went through neck  
"slight downward trajectory" & "entered from the  
P100 neck

Weston & LBS say nobody knew exact position P100 & JBC's  
bodies.

Use Lattin's chart of Weston say left the  
- in neck. Cuffs Skutch "verified" as shoulder  
mark sketch. no ref to fragmentation in body -  
head to body only

Art what as to Buntley order what was not done  
single bullet "truly" settled one way or  
the other" from "what is known today"

McClellan - LHO & other come to him for a "exam"  
with "fall yellow with a mustache" - horita  
says he had on did he know Oswald. Num med also positive  
but "didn't want to get involved"  
"Oswald's part was full of adon connections" - however  
might a section

McClellan & Hill both ~~hesitant~~ hesitate in answers  
The medical part is deliberate posed deliberate bits of  
omit what was known to be reported by LBS
