## Warren Unit <sup>7-3-47</sup> Should Have Seen Films

WASHINGTON (UPI) — John J. McCloy, a member of the Warren Commission, said Sunday "for the sake of completeness," the official investigation of the Kennedy assassination should have included a look at the late President's autopsy photographs and X-rays.

The Commission had the power to subpoena the films, he said, but chose not to. "We were perhaps a little oversensitive to what we understood was the sensitivities of the Kennedy family against the production of colored photographs of the body, and so forth," he said.

McCloy disclosed in a television interview (Face The Nation—CBS) that Chief Justice Earl Warren, Commission chairman, discussed the photographs with the Kennedy family, which had them during the inquiry.

"I think there's one thing I would do over again," he said. "I would insist on those photographs and the X-rays having been produced before us."
