

Yesterday I got word from Memphis on the judge's anticipated decisions, schedule and his intent to accommodate the major media. I suggested to JL that he tell Valentine. When Jim spoke to me later he told me he had, that the Post will probably fly Paul down to do their own story, and that Paul had noted JL had been checking some we-thing CIA incorporation records in the District/ government files. How come? The Post got a tip from a woman claiming to have been part of the operations and PV was checking it out. We'll see if the Post uses the story. Pacific Engineering & Architecture Co., a proprietary, we think, from some earlier checking beginning with Continental News and Hunt (the other). We got into quite a nest of these from what I take to be CIA carelessness, using the same address and phone for them all... Seems that Continental was twice adjacent to my friend Dave Pollard, first in Munsey Bldg, then when both moved to National Press Bldg. Jim thinks it may be innocent. I've done no personal checking, but my friend has not been very diligent in representing my interest with Freed et al.
