## CIA Batch F received 4/20/77

1327-499A on Joesten, his book and publicher. "ed-baits. Signature and some of extensive distribution masked. 1238,9,40 his literature.

1240-1005 mefers to de Mohrenschildt as "George."

1257-1035 Valdo Regas' call to GIA

1260-1033 Marine, former FEI agent employee, who knew LHO

1265-464 Undated LEE HARVEY SNALD is hardly a summary of all the CLA's information as of the time of the last info. referred to. Last entry, 5/, says mays CLA had received a report from the FBI on the 9/7/62 interview with Oswald. This was from a "contact he had made with the Soviet Embassy." He make told FBI it was to give them Marina's address. Is this in the Main report, that they went there over the letter intercept?

1267-1031 is 12/18/63 excerct from 21/1 Wash Post reporting that Oswald had met with Priscilla Johnson. Par. 2. entirely macked. "Natters relating to foreign parkey intelligence sources and methods. ...identifying an Agency dtaff employee..."

1272-1028 2/20/64 says that MxCCuty cables made available to WH, whether or not WW. WE WC had them. Indication withhelding from Commission this early. He which info it is to be given.

1275-1027 3/10/64 comment on Allen-Scott report that LHO met with Agency employees in Noscow Embassy. It then says that cable 234 says that Oswald met with Second Secretary Richard E. Snyder and "there is no indication from the dispatch that any other Government employee participated in the interview." Then it notes prior stories that Priscilla Johnson had not with Oswald. Deginning of par 4 masked, unmasked part beginning "Johnson's biographic data reflects..." Reason for withholding, which also includes Pars. 5 and 6,, "intelligence methods and information" that would invade personal privacy, Midentifying an agency component and an Agency employee..." This does seem to finger Snyder and Johnson.

1281-1024 three lines quoted from The Invisible Government on Capt. Alexie H. Davison.

1289-1019 says that CIA saw galleys of Ford's book long before publication. Maskings of names probably identifies employees who do this kind of work.

1293-468 page 2 says "There is no record that OSWALD was utilized by this Agency." (Interesting in that reference is to existing record only and "this" agency.)

1294-481 6/19/64 has maskings 1st page relating to Murretts, Marilyn in particular. Page 5 has reference to "report of interview of George DeMOHREESCHILDT" not saying by FBI and giving details of Marina's dental appointments. He here is again referred to as "George." Page 4 maskings related to Davison followed by "DAVISON was apparently never used <u>clandestinely</u> by the Agency." <sup>6</sup> artin Isaacs was the subject of an investigation that discloses aliases (Page 5). Page 6 reference to Bringuier does not disclose his use by Agency. (This is one of series of reports on Osmald's addressbook.) Another is 1296-469. Beginning on page 2 after According to information furnished to the FBI" there is masking of half this pages and 8 pages the first of which is headed "Attachment" The last 4 bears numbers 9-12. <sup>6</sup> r more than 8 pages are withheld. These should be studied camefully, parti cularly what is masked. There are indications, for example, that some of the people may have applied for CIA employment or have been employed. One follows mrs. ar Clark. Another (1305-472) follows Jaggers-Chiles-Stovall. The examptions claimed could indicate a connection. The CIA had early interest in the K<sub>a</sub>rtello slip (see 0 in N.C.) 1314-1056D on Garrison case refers to a Clay Shaw files. It does not have indicated attachments. Nor do several following on same general subject.

1326-1042 Shows DJ knew of Shaw connection not later than 1967. 8 seemingly routine Demostic Contact Service connections only noted. Seemingly hut not definitive demials of associations with others in "arrison case. But 1331-502/1045, p. 3 reports a "tenuous" psesobility "interlinking with a personality reportedly from <u>Ramparts Magazine</u>." One possibility "Jim Rose?" Later there is masked reference to William Turner.

2

1345-1057, marked as "Same as 1230-515, is a 7-pp report on ""arrison and the Kanuedy Assassination. A total of 103 traces is broken down into four lettered divisions, all masked except the four letters and the total. Beginning on 4 all is masked save one graf reporting a news story on trial schedules. Exemptions claimed indicative of CIA connections this case also involving "operational cryptonyms."

1351-1059 B on Hunt and Syurgis also hold info on Interpen, Hemming, Hall, etc.

1353-496 is 10/29/75 on Oswald with attached Material from 1967-6 interviews with Negenko. Maither it nor the sentioned inter-cords are attached. Two pages of an interview transcript are. At the end Nosenko appears to be asked to write out all about Oswald again. a deaurs, saying he had been questioned extensively and that what he then said. "was very, very strictly put, everything, everything." Also, "I wasn't working against him - nothing more." Both quotes from p. 29, Last of interview. Nosefiko indicated by S, interrogator by L. The first part was about the book Svetlana. Under date of 5/3/68 there is 1354-495 with Nosenko's handwritten report headed Oswald attached. By and large it is consistent with the FELSs reports on what he said. Here he Madds that because Oswald was suspect a "file on him was opened in the beginning of 1960 by a senior case officer of maximum i section 7 Repartment Krupmov, K.G. and then sent to Monsk for KGB's work - to watch Osvald (sic)." Three card on LEO, 1 on Marine attached. "andwriting is such the Harvey could be taken as Henry or "arry, which raises questions.

1357-506 4/5/67 On Oswald Case and Jack Martin, mentions Guy Banister as #428810.

1360-504 seems to identify CIA opposition to "arrison case as Project Resistance.

1362-1061-A does not deny any connection with "artens." t indicates other records on him and his association with John Edward Whelan. Subject of memo David Ferrie, date 12/20/73. What was the interest then?

1363-501 says no Arcacha connection and links him only with FRD, Frente. Says the 544 camp office was of FRD, which is wrong. It was CRC and that was CLA. Interesting they tell this lie when they did support CRC until 4/63 and they report Arcacha thrown out of Frente in 1962.

In general it appears that everything is withheld because it relates to foreign intelliggnes. It seems that Agency cojtacts of those names may be limited to a DCS connection. That Nosenko was put through questioning again in 1/68 may be interesting. That does ecincide with Garrison activity.

Some of the reviewed documents are withheld in their entirely. I have not read the index to determine the claimed reason. Some of these are in a sequence indicating a possible connection with publicating.
