

9/26/72 The returned-herewith ltr from the American Committee on Africa does have the value of eliminating error in my recollection of Ned's group's name. It ain't this! Not with some of those names, despite Norman Thomas' involvement in another CIA thing. JNS is a friend of PH's. Some of his perceptions are pretty sharp. He turns on and off like a fire-fly bud had shortly before this offered to do some library work, at which he is good. Nothing else new on this. Nor any response from Gary on that or anything else. Thanks, HW
