# C.I.A. OPERATIONS: A PLOT SCUTTLEI 42866

Plan to Doctor Cuban Sugar **Depicts Control Problem** 

Following is the fourth of five articles on the Central Intelligence Agency. The articles are by a team of New York Times correspondents consisting of Tom Wicker, John W. Finney, Max Frankel, E. W. Kenworthy and other Times staff members. Special to The New York Times

WASHINGTON, April 27-On Aug. 22, 1962, the S.S. Streatham Hill, a British freighter under Soviet lease, crept into the harbor of San Juan, Puerto Rico, for repairs. Bound for a Soviet port with 80,000 bags of Cuban sugar, she had damaged her propeller on a reef.

The ship was put in drydock, and 14,135 sacks were off-loaded to facilitate repairs. Because of the United States embargo on Cuban imports, thé sugar was put under bond in a customs warehouse.

Sometime during the lay-up, agents of the Central Intelligence Agency entered the customs shed and contaminated the off-loaded sugar with a harmless but unpalatable substance.

Later, a White House official. unning through some intellience reports, came upon a aper indicating the sabotage. e investigated, had his suspitons confirmed and informed Fresident Kennedy, much to the annoyance of the C.I.A. command.

The President was not merely annoyed; he was furious, because the operation had taken place on American territory, because it would, if discovered, provide the Soviet Union with propaganda field day, and beuse it could set a terrible tage in the undeclared "backrecedent for chemical saboalley" struggle that rages con-stantly between the West and the Communist countries.

Mr. Kennedy directed that the doctored sugar not leave Puerto Rico. This was more easily ordered than done, and it finally required the combined efforts of the C.I.A., the Justice

Continued on Page 28, Column 1

### **Continued From Page 1, Col. 2** her Department; the Federal Bureau of investigation, the State De-partment, customs agents and

harbor authorities to dis-intrigue the intrigue. The Soviet Union never got its 14,135 sacks of sugar; whether

it was compensated for them has not been disclosed. It would be unfair to conclude

hat this was a typical C.I.A. peration. On the other hand, it annot be dismissed as merely the unwise invention of some agent who let his anti-Communist fervor get out of control.

There is good reason to believe that a high-level political decision had been taken to sabotage, where feasible, the Cuban economy. The sugar project, harum-scarum as, it was, developed from a general policy determination in the Plans Division of the C.I.A., and the genral policy, if not the specific plot, presumably had the approval of the interagency, sub-Cabinet group responsible for reviewing all operations that could have political consequences. This was not, then, a well-laid

plan that went sour in the oper-ation; it was a badly laid plan that was bound to cause trouble. It is instructive because it il-

It is instructive because it, il-lustrates many of the control problems in C.I.A. operations and makes plain why, from the outset, so many questions have been so persistently raised by so many critics about the ade-quacy of these controls.

#### A Major Concern

First, there is the pre-eminent concern whether the C.I.A., despite its disclaimers to the conand business of the terms of ance or restriction from the political departments of the

Government. Operations like that of sabo-taging the Cuban economy can lead to such dangerous episodes as the sugar doctoring; they can acquire a momentum and life of their own, the consequences of which cannot be anticipated by political officers who may have given them original approval.

Thus, it should be noted that, n the sugar tampering, the I.A. and its agents unquestion-bly believed they were operase g within, approved instrucions, and consequently resented what they regarded as "inter-arence" by the White House officer who reported it to the Bresident esident Another example of operations assuming a life of their own occurred in 1954 during the C.I.A. engineered revolution against the Communist-oriented President of Guatemala, Jacobo

President of Guatemala, Jacobo Arbenz Guzman. A P-38 fighter, piloted by an American, bombed a British ship, the Spring-Fjord, which was lying off-shore and was be-lieved to be carrying airbraft to the Arbenz Government. Only one of the three bombs ex-ploded, and no crew members were injured. The ship, which was actually carrying coffee and

was actually carrying coffee and cotton, was beached. Richard M. Bissell, a former C.I.A. deputy director for plans, has admitted that the bombing was a "sub-incident" that "went beyond the established limits of policy."

An outstanding example of an operation with political conse-quences was the dispatch of Francis Gary Powers on the U-2 flight from Pakistan to Norway 1, 1960, just before the Paris summit meeting and the sched-uled visit of President Eisenhower to Moscow.

#### Unresolved Question

The U-2 photoreconnaissance flights had been going on for nearly five years, with fabulous-ly profitable results. It was es-tablished practice for the Presi-dent to provide the the transtablished practice for the Presi-dent to approve in advance a set of flights within a given time span, and there was also established machinery for the approval of each flight by the Secretary of Defense. Yet, to this day, no one then in the top councils of the Government is able to say with certainty whether the Powers flight, the last in a series of six, was spe-cifically approved by Thomas S. Gates Jr., then the Secretary of Defense. Defense. One Senator has said that the

One Senator has said that the U-2 flight was a perfectly legiti-mate operation of great value, and that the embarrassment to the President was not inherent in the project but was the re-sult of a lack of coordination and controls.

and controls. "The operation," he said, "just went along regardless of the political circumstances." A second serious control ques-tion derives from the special position of the CLA. as the Government's fountain of neces-sary information. This appears to be at once the major advan-tage and a principal hazard of the CLA. operation today. "Policy," Allen W. Dulles, the former CLA. chief, once said, "must be based on the best esti-mates of the facts which can be put together. That estimate

mates of the facts which can be put together. That estimate in turn should be given by some agency which has no axes to grind and, which itself is not wedded to any particular

This point is often made by 

C.I.A. and its defenders. They cite, for instance, the agency's accurate estimate on agency's accurate estimate on Soviet missile strength, as a contrast to the inflated estimates that came from the Pentagon in the late Fifties. The latter, they sovice rivalries and budgetary buffees—such as the Air Force's desire for more missiles of its desire for more missiles of the second y distorting or coloring its re-orts and estimates.

Mr. Dulles-like Secretary of State Dean Rusk-insists that State Dean Rusk—misists that, no C.I.A. operation "of a po-litical nature" has ever been undertaken "without appropri-ate approval at a high political level in our Government" out-side the C.I.A.

The problem is that the facts presented to the Government by the C.I.A. are sometimes drama-tic and inevitably tend to inor and ineviacity tend to in-spire dramatic proposals for clandestine operations that the agency's men are eager to carry out, and that they believe car-or might-succeed.

Long Odds Can Help Even long odds sometimes work to the agency's advantage. President Eisenhower, for in-stance, has written that he undertook to aid pro-Western rebels in Guatemala in 1954 because Mr. Dulles told him the operation had only a 20 per cent chance to succeed. If the C.I.A. director had estimated a better chance than that, General Eisen

chance than that, General Eisang hower wrote in his memoirs, he would have been uncellistic, un-convincing and overnuled. Command on the facts—ai least the best facts available plus seal to do something about them, many critics fear, can make the C.I.A. an unanswer-able advocate not for a vested able advocate, not for a vested able advocate, not for a vested budgetary or policy interest, but for its own sincere notions of how to proceed. And its advan-tage of providing the facts on which decision must be made, these critics feel, can enable it to prevail over the advice or fears of political officers. Thus, in 1958, Amhassador John Allison strongly opposed the plan of Allen Dulles to aid the rebel movement in Sumatra

the rebel movement in Sumara against President Sukarno of Indonesia. But Mr. Dulles had Won the powerful support of his brother, Secretary of State John Hoster Dulles ster Dulles.

Poster Dulles. Uttimately, the plan went for-ward—with the result that an American pilot was shot down and captured by the Sukarno proces, causing a conspicuous deterioration of relations be-ween Indonesia and the United States The plan was not man

A third problem of control arises from the necessary secre-cy that surrounds the agency. To protect its sources of infor-

mation, to permit it to proceed mation, to permit it to proceed with any form of clandestine operations, to guard the nation's political relations with most other countries, it is necessary for the C.I.A. to be shielded— and Congress has so shielded it, by law—from the ordinary scru-tiny, investigation and public disclosure of activities that other Government agencies must other Government agencies must undergo.

Within the agency, until the Bay of Pigs disaster of 1961, even the Intelligence Division was not allowed to know about the "dirty tricks" being planned and carried out by the Plans Division Division.

#### Stevenson in the Dark

Many of the highest Govern-ment officials are told nothing of some of the agency's activi-ties because, in the course of their own duties, they do not "need to know." It is now well established the

It is now well established, for It is now well established, for instance, that until the disaster unfolded, Adlai E. Stevenson, the United States representative to the United Nations, knew nothing of the Bay of Pigs plan. As a result, he and his Govern-ment suffered grievous humilia-tion after he publicly mistered. tion after he publicly misstated the facts.

In years past, C.I.A. secrecy reached some absurd proportions reached some absurd propositions —with high-level employes iden-tifying themselves solemnly at cocktail parties as "librarians" and "clerks." In its early days, for instance, C.I.A. employes who in their private lives need-who in their private lives need-to apply for credit were in-structed by the agency to say, when asked for an employer's reference: "Call Miss Bertha Potts" at a certain number. Potts" at a certain number. It was not long, of course, be-fore the lenders who were told to call Miss Potts would say gleefully: "Oh, you work for the CTA." C.I.A."

For many years prior to 1961,

a good many critics had been a good many critics had been aware of, the control dangers inherent in the C.I.A.'s peculiar position. In 1954, Senator Mike Mansfield, Democrat of Mon-tana, obtained 34 cosponsors for a bill to create a 12-member joint committee on intelligence to Reep watch over the C.I.A. Joint committee on intelligence to Reep watch over the C.I.A., much as the Congressional Joint Committee on Atomic Energy does ever the Atomic Energy Commission.

Allen Dulles, who was com-etely satisfied with the scru-by provided by four carefully dected subcommittees of the spected subcommittees of the Senate and House Armed Serv-ides and Appropriations Com-mittees, went to work. He suc-cideded in cutting away 14 of Mr. Mansfield's cosponsors, and the bill was defeated, 59 to 27.

Board Headed by Killian A year later the second Hoover Commission also recommended a Congressional joint committee, as well as a Presi-dentially appointed board of consultants on intelligence ac-tuities tivities.

To forestall the first. Mr. To forestall, the first, Mr. Dulles acquiesced in the second, and in January, 1956, President Eisenhower named a board of consultants on foreign intelli-gence activities, with James R. Killian Jr., president of the Massachusetts Institute of Tech-Pology as chalmen

nology, as chairman. Those familiar with the board's work in the Eisenhower years say it performed a useful function on the technical side, where Dr. Killian, for instance, was a powerful advocate in the development of the U-2. How-even it is generally agreed that the board did not give very critical attention to "black" operations, and then only after the fact.

In 1954 there was also estab-In 1954 there was also estab-lished by the National Security Council — which advises the President on defense and for-eign policy matters—what came to be known as "the special group," or the "54-12 group," after the date (December, 1954) of the secret directive arguing of the secret directive ordering its formation.

This directive also provided the basic charter for the agen-cy's countersubversive and counter-Communist activity. Until that time, these activities had been undertaken under author-ity of a secret memorandum from President Truman issued in 1947 and inspired principally by the Italian, Czechoslovak and Berlin situations, then acute cold-war issues.

The 54-12 group was-and still is-composed of the President's special assistants for national special assistants for national security affairs, the director of the C.I.A., the Deputy Secre-tary (or Deputy Under Secre-tary) of State for Political Af-fairs, plus other officers con-sulted occasionally on particular proposals. proposals.

The group seems to have been created, partly at least, in re-sponse to public concern over the problem of control, and it was given responsibility for passing on intelligence opera-tions beforehand. However, be-cause of the fraternal relation-ship of Allen Dulles and John Foster Dulles, because of their close relations with President Eisenhower and because Allen Dulles had the power to give it the facts on which it had to base its decisions, the 54-12 group during the Eisenhower Administration is believed by Administration is believed by knowledgeable sources to have exercised little real control.

The Classic Disaster

At the Bay of Pigs, just after President Kennedy took office in 1961, the worst finally hap-pened; all the fears expressed through the years came true. The Bay of Pigs must take its.

place in history as a classic ex-ample of the disaster that can occur when a major interna-tional operation is undertaken in deepest secrecy, is politically approved on the basis of "facts" provided by these whe approved on the basis of "facts" provided by those who most fervently advocated it, is car-ried out by the same advocates, and ultimately acquires a mo-mentum of its own beyond any-thing contemplated either by the advocates or those who suppos-edly "controlled" them. Responsible officials of the Bisenhower Administration re-

Elisenhower Administration re-Eisenhower Administration re-port, for instance, that the in-vasion plan was not even in existence, as such, when they went out of office on Jan. 19, 1961; there was nothing but a Cuban refugee force, available for whatever the incoming Ad-ministration might ultimately decide to do with it. Yet the testimony of Kennedy Yet the testimony of Kennedy Administration officials-Theo-

ore C. Sorensen and Arthur M. Schlesinger Jr., for instance—is Schlesinger Jr., for instance—is int the matter was presented o. Mr. Kennedy by the C.I.A. dvocates as if he were already parmitted to it and would have o cancel it rather than approve t. Mr. Sorensen even wrote in his book, "Kennedy," that Mr. Kennedy had been subtly pushed o be no less "hard" in his anti-fastroism than President Ei-senhower supposedly had been. "The ultimate disaster and its The ultimate disaster and its various causes need no retelling. Their effect was graphically de-scribed by an official who saw the shaker Mr. Kennedy imme-diately afterward. The Presi-dent, he said, "wanted to splinter the CLA. in a thousand pieces and scatter it to the winds." It the same time, to Clark M. Chiford, a Washington lawyer and close friend, who had writ-en the legislation setting up the L.A. during the Truman Ad-innistration, Mr. Kennedy said flaty and poignantly: The ultimate disaster and its

flatly and poignantly: "I could not survive another ine of these."

#### An Inquiry Ordered

But because he could not simply abolish the agency, much less its function, the President decided he would "get it under control.

control." First, he ordered a thorough investigation by a group headed by Gen. Maxwell D. Taylor and composed also of Allen Dulles, dmiral Arleigh Burke, Chief of Naval Operations, and At-urney General Robert F. General Robert rney F. Kennedy.

Second, on Mr. Clifford's ad-Second, on Mr. Clifford's ad-vice, the President recreated the old board of consultants under the title of the Foreign Intelli-gence Committee and asked Dr. Killian to resume the chairman-ship. (Mr. Clifford became a member and later succeeded Dr. Killian as chairman.) The PresIdent directed the committee to investigate the whole intelli-gence community from "stem to stern," recommend changes and see that they were carried out.

see that they were carried out. Third, after a decent interval, the President replaced Allen Dulles with John A. McCone, a former chairman of the Atomic Energy Commission. He told the new director that he was not to be simply the director of the C.I.A. but should regard his primary task as "the coordina-tion and effective guidence of tion and effective guidance of the total United States intelli-gence effort." Mr. Dulles's key the total United States intelli-gence effort." Mr. Dulles's key assistants were also removed. Fourth, the President sent a letter to every Ambassador tell-ing him he was "in charge of the entire diplomatic mission" at his post, including not only foreign service personnel but "also the representatives of all other United States agencies." These representatives of other Agencies were to keep the Am-beasador "fully informed of their views and activities" and would abide by the Ambassador's de-cisions "unless in some particu-lar instance you and they are wotified to the contrary." The President followed this letter, which was made public, with a secret comunication, aying he meant it and specifi-eally including C.I.A. men among those responsible to the ambassador.

#### A Blow to Bundy

Perhaps the most important change in control procedures, however, involved the 54-12 group within the political ranks of the Administration, and it came without any Presidential initiative Initiative.

initiative. The Bay of Pigs had dealt a severe psychological blow to McGeorge Bundy, who as the President's assistant for nation-al security affairs was a mem-ber of the group, and perhaps also to his self-esteem. There-after he set about tightening up the surveillance of C.I.A. opera-tions, subjecting them to search-ing analysis before and not after the event. This hard-eyed Mr. Sundy was notably relentless at that kind of administration. The President accepted the

The President accepted the advice of the Taylor and Killian investigations on two important duestions.

First, he decided not to limit the C.I.A. to intelligence gather-ing and not to shift clandestine operations to the Pentagon, or D a special agency created for the Direct

These ideas had found favor smong some sections of the State smong some sections of the State Department, among many public cittics and even among some members and the staff of the advisory committee. Sut it was stoutly opposed by Allen Dulles, who argued that this would re-sult in duplication and rivalry, and that, the two functions were interdependent, though he ad-

tted that they had not been orking in harness on the Bay Pigs operation. The two committees of inquiry

agreed with Mr. Dulles, and so, finally, did the President. Second, the committees recom-

mended, and the President en-thusiastically agreed, that the C.I.A. should leave sizable mili-iary operations to the Pentagon and henceforth limit itself to operations of a kind in which United States involvement would be "plausibly deniable." This, however, has proved to be a rule of thumb in which it is often difficult to hide the thumb.

#### Something Like Secrecy

For instance, the later crea-tion of an air force of anti-Castro Cubans to fly for the Congolese Government was carried out and managed by the C.I.A., not by the Pentagon, de-spite the recommendation.

The obvious reason was that the agency could do the job in something like secrecy, while Defense Department involve-ment would have been neces-sarily more open, advertising the backing of the United States for the "instant cin forme"

for the "instant air force." It is beyond dispute, however, that the Bay of Pigs was a watershed in the life of the C.I.A. and its influence on pol-lcy-making. Before that, no matter how much administrative control and political approval there may have been, Mr. Dulles ran the agency largely as he saw fit.

saw fit. He was able to do so because he could almost always get "ap-prova!"—and thus adhere to the forms of control — from his brother in the State Depart-ment or from President Eisen-hower, with both of whom he

hower, with both of whom he had the closest relations of trust and liking. The effect of the Kennedy stake-up was immediately ap-marent—on policy in Laos, for ustance. W. Averell Harriman, then the Assistant Secretary of state for Far Eastern Affairs, was given a free hand in getting and of the American puppet, Fremier Phoumi Nosavan— whose backing by the C.I.A. Piesident Elsenhower had spe-cifically approved — and rein-stating Souvanna Phouma at the head of a neutralist govern-ment. ment.

By general agreement of vir-tually every official interviewed, the C.I.A. does not now directly the C.I.A. does not now directly make policy, and its operations are under much more rigorous surveillance and control than before. Nevertheless, there con-tinue to be—and probably al-ways will be—instances where the controls simply do not work.

#### **Uncertain Boundaries**

Richard Bissell, who as deputy lirector for plans was largely esponsible for the U-2 recon-haissance triumph and for the Bay of Pigs disaster, has ex-

plained why this must be. "You can't take on operations of this scope," he has said, draw narrow boundaries of policy around them and be ab-solutely sure that those bounda-

solutely sure that those bounda-fies will never be overstepped." Recently, for instance, the C.I.A. was accused of sup-porting Cambodian rebels who oppose Prince Norodom Siha-nouk, the head of state. Even some senior United States Foreign Service officers said they were not sure that the agency's firm denials meant no agent in Tirm denials meant no agent in the field, no obscure planner in the huge C.I.A. building in Vir-ginia, had strayed from the strict boundaries of policy. A high degree of control of C.I.A. activities exists, however, and inquiry produced this pic-ture of the controlling agencies

ture of the controlling agencies and how well the control works:

## The 54-12 Group

The 54-12 group is the heart of the control system. Its mem-members now are Admiral William F, Raborn, the C.I.A. di-rettor; U. Alexis Johnson, Dep-uly Under Secretary of State for Political Affairs; Cyrus R. Vance, Deputy Secretary of Derinse, and two Presidential as-stants, Bill D. Moyers and Valt W. Rostow, who have re-laced McGeorge Bundy in rep-esenting the White House.

This group meets once a week with a detailed agenda. It concentrates almost exclusively on operations. It approves all proposed operations and it passes in great detail on ex-penditures as small as \$10,000 that have political implications or could prove embassessing if discovered. Any differences are referred first to the Cabinet level and then, if necessary, to the President. While the group approves

very "black" operation, it does every "black" operation, it does not necessarily clear all the poutine intelligence -gathering activities of the agency. Nor, once approval has been given for a "black" operation, does it maintain a running supervision over every detail of its execu-tion tion

Under a given policy decision Under a given policy decision approving a guerrilla operation in a certain country, for in-stance, the 54-12 group might also have to approve something as specific and important as a bridge-blowing. But the over-all program would go on by itself under the diraction of agains in under the direction of agents in the field.

#### Bureau of the Budget

Another form of control is

Another form of control is that of the pursestring. The C.I.A.'s annual request for funds, which is hidden largely in the 'Defense Department budget, is the responsibility of the head of the Budget Bureau's International Division. The re-quest has usually fared well, but in the fiscal year 1965, for the first time in several years, it was cut back sharply by the hureau.

Another form of budgetary control centers on the agency's "slush fund," which used to be about \$100-million a year and is now in "the tens of millions." One official has said that "the C.I.A. can't spend a dollar with-out Bureau of Budget approval." But another official put a somewhat different light on how the

what different light on how the "slush fund" is handled. Suppose, he said, that Country k is having an election and the andidates backed by the Unit-d States Government seem ecaded for defeat. The Ambas-ador and the C.I.A. station hief\_the agency's chief in that ountry-may forward a re-uest for some fast money to spread around.

The request, when reviewed and cleared by the middle levels of the State Department and the C.I.A., goes to the 54-12 group for review.

for review. This group will first decide whether the money should be spent, how the C.I.A. should spend it and how much should be made available. Then the re-quest goes to the Budget Bureau to be justified in budget terms against other needs.

A Call Brings the Money For example, this official said, one such project was recently trimmed by the Budget Bureau from \$3-million to \$1.7-million. But in the last week of the elec-tion, the C.I.A. ran out of funds just as it needed some more bill-boards plastered, and it was able to get the money simply by a phone call to the Budget Hureau. This official explained that there had to be some way of providing "quick-turn money" under tight controls and audit. It should also be noted that

It should also be noted that this form of control is purely bulgetary and not substantive. The Bureau of the Budget does not interpose any policy judg-ment but simply weighs a pro-posed operation against total money available and the outlays for other projects. for other projects.

## Foreign Intelligence

## Advisory Board

Another control agency is the Foreign ntelligence Advisory Board. This group has nine members. Four have had ex-tensive government experience. Eensive government experience. The chairman, Clark Clifford, was special counsel to President Truman from 1946 to 1950. Among the other members, Robert D. Murphy, former car-eer Annbassador and former Under Secretary of State for Political Affairs, has had per-sonal experience in clandestine operations, for he prepared the operations, for he prepared the way for the American landing in North Africa in 1942. He is now a director of Corning Glass. Gordon Gray, a director of

the R. J. Reynolds Company and a newspaper owner, was Secre-tary of the Army under President Truman and later was President Eisenhower's special assistant for national security affairs. Frank Pace Jr., chair-man of the Special Advisory Board, Air Force Systems Com-mand, was director of the Bur-cau of the Budest in 140 50 eau of the Budget in 1949-50 and Secretary of the Army from 1950 to 1953.

Two members are scientists onnected with industry — Wil-iam O. Baker, vice president in harge of research for the Bell harge of research for the Bell elephone Laboratories, a mem-ber for many years of the Sci-nce Advisory Board of the Air Porce, and Edwin H. Land, Anairman and president of the Folaroid Corporation, a former adviser to the Navy on guided missiles and an evenet on the missiles and an expert on pho-bgmaphy. There are two military repre-

There are two military repre-sentatives—General Taylor, for-mer chairman of the Joint Chiefs of Staff and former Ambassa-do to South Vietnam, and Ad-m ral John H. Sides, commander in chief of the schedite. Elect from 1960 to 1963. Dr. William L. Langer, the ninth memory as horizon of History at Horizon is History at Harvard nd a frequent government con-

and a frequent government consultant.
The board meets an average of one or one and one-half days a month. It is subdivided into two-man panels specializing in various fields, which meet more frequently. Individual members also take field inspection trips. Mr. Clifford went recently to South Vietnam; Mr. Gray has been on extensive trips to the Middle East and Southeast Asia.

to the Middle East and South-east Asia. There is divergent opinion on the control value of this board. Some of its members are highly pleased with their own work. They point out that over the last four and one-half years they have made some 200 recom-mendations, of which the Presi-dent accepted 95 per cent. They take credit for persuad-ing President Kennedy and Sec-retary of Defense Robert S. Mck-Namara to create the Defense

Namara to create the Defense Intelligence Agency, combining the separate service intelligence divisions. This had been recom-mended by Secretary of Defense Gates and by Lyman Kirkpatrick, inspector general of the C.I.A., as a result of the widely differing estimates of the so-called "missile gap" in the late

dia.

nineteen-fifties made by the in-telligence arms of the services. Another official in a position of authority, however, believes that the board does little more than provide a "nice audit" of C.I.A. operations and that any "control" it exercises is largely ex post facto. He asked what bould be expected from a board that met only a few days a month. "By 5 in the afternoon," he

said, "the guys can't remember what they were told in the morn-

What they include the members concede Even the members concede that their work has been aimed primarily at improving the ef-ficiency and methods of the C.I.A., rather than at control individual operations. Thus, C.L.A., rather than at control of individual operations. Thus, is the board does investigate some "black" operations, its em-phasis is placed on whether it was done well or could have been more successful, rather than on the political question of whether it should have been done at all.

one member reported, how-ever, that the C.I.A. now brought some of its poposals to the com-mittee for prior discussion, if not specific approval. This is not an unmixed blessing. While the board might advise against some risky scheme, it also might not; in the latter case its weight added to that of the C.I.A., would present the responsible political officials in the 54-12 group with an even more powerful advocacy than usual. An advantage of the board

usual. An advantage of the board is its direct link to the Pres-ident. Since this is augmented, at present, by Mr. Clifford's close personal and political ties to President Johnson, any rec-ommendations the committee makes carry great weight with the bureaucrats of the C.I.A., even before they appear in a Presidential order.

### State Department and Ambassadors

and Ambassadors Also exercising some control over the C.I.A. are the State Department and Ambassadors. Secretary of State Rusk has confided to his associates that he is now quite certain the C.I.A. is doing nothing affecting official policy he does not know about. But he added that he was also sure he was the only one in the State Department informed about some of the things being done.

Despite this information gap as high as the Under Secretary and Assistant Secretary levels, State Department officers with a need to know are far better

a need to know are far better informed about operations than before the Bay of Pigs. Moreover, in the 54-12 group and in interagency intelligence meetings, State Department of-floers are now more ready to speak out and more likely to be heeded on proposed intelligence operations that they believe would compromise larger policy interests.

President Kennedy's secret letter to the Ambassadors also had some effect in changing a dangerous situation. 1 In 1954, William J. Sebald re-

signed as Ambassador to Burma because of continued C.I.A. support to Chinese Nationalists in northern Burma despite all his protests. In 1956, James B. Conant, Ambassador to West

Germany, was not told about the tunnel under East Berlin. In 1960, in Laos, Ambassador the tunnel under East Berlin. In 1960, in Laos, Ambassador Winthrop G. Brown was often bypassed as the C.I.A. helped prop up the American-backed Premier Phoumi Nosavan, against his advice. The same year, the Ambassador in Malay-sia knew nothing of the Singa-pore operation that ultimately was to embarrass the State De-nartment in 1965.

Was to emplartase the state be-partment in 1965. It is doubtful whether such things could happen today if an Ambassador is forceful enough in establishing his au-

thority. In the last four years the Am-bassadors have been kept much passadors have been kept much better informed, and their rela-tions with C.I.A. chiefs of sta-tion have been consequently more cordial. Ambassadors Clare Timberlake and Edward Guillion were completely posted on C.I.A. operations during the Congo crisis and worked closely with the agency. So, apparently, was Henry Cabot Lodge after

Was Henry Cabot Lodge after he took over the embassy in Saigon in 1963. While the Ambassador may not always be completely mas-ter in his own house, neither does it seem to be true—as a staff report of Senator Henry M. Jackson's subcommittee on national security staffing and operations said in 1962 — that the primacy of the Ambassador, supposedly established by the Kennedy letter, was largely "a poilte fiction." For example, Robert F. Wood-ward, Ambassador to Spain.

vetoed a man chosen to be the C.I.A.'s Spanish station elice. And the State Department, while still complaining about the size of some C.I.A. stations, is viow supposed to approve the number of agents in each diplomatic mission.

supposed to approve the number of agents in each diplomatic mission. In secret testimony before the Senate Foreign Relations Com-mittee in the summer of 1965, Inder Secretary of State Thom-as C. Mann made bran that the creation of the Imbert military funta in the Dominican Repub-lie in May was a State Depart-ment, and not a C.I.A., idea. Asked whether the C.I.A. would have set up the junta without orders from State, Mr. Mann replied: "I will say that in the past this may have been; I do not know. But since I arrived in January, 1964, I have had an understanding first with Mr. McCone and now with Admiral Haborn, and I am sure the de-partment has, even more im-portantly. that the policy is

partment has, even more im-portantly, that the policy is made here [at State] and that upthing is done without our con-

This "nothing" probably goes too far, since there remain areas of ambassadorial ignorance. An Ambassador is not, always in-formed of "third-party" spying in his country - for example,

spying in France on the Chinese Communists there. Nor is he given specific details on coun-terespionage and information gathering about which he may be generally informed. If the C.I.A. has "bought the madam" as one official put if

If the C.I.A. has "bought the madam," as one official put it, of a house of ill fame patron-ized by influential citizens or officials of a host country, the Ambassador does not know it and probably doesn't want to. He would, however, have the dubious benefit of any informa-tion the madam might disclose. These are the four institution-al forms of "control" of the C.I.A. that now exist—save for Congressional oversight and the all-important role of the agen-

Congressional oversight and the all-important role of the agen-cy's director. And The New York Times's survey for these articles left little doubt that the newly vigorous functioning of these four groups has greatly improved coordination, more nearly assured political ap-proval and substantially re-duced the hazards implicit in C.I.A. operations.

C.I.A. operations. Nevertheless, the agency still remains the fount of information remains the fount of information on which many policy decisions rest, and the source of facts, selected or otherwise, on which to justify its own projects. Nevertheless, the C.I.A. en-joys an inherent advantage in any conflict with the State or Defense Denortments hereuse of

Defense Departments because of its undeniable expertise-espe-official scrutiny as all other agencies undergo.

A Call for More Control

For all these reasons, and be-cause of occasional blunders, there has been no abatement in the demand of critics for more and stronger control. Inevitably, their call is for some form of increased supervision by the people's representatives in Com-crease usually, by a joint com-

increased supervision by the people's representatives in Con-gress, usually by a joint com-mittee of the two houses. The Times survey indicated a widespread feeling that such a committee would do the agen-cy's vital functions more harm than good, and that it would provide little if any solution to the central problem of control. The history of the Central Intelligence Agency since 1947 makes one thing painfully clear — that the control question, while real and of the utmost importance, is one of "not measures but men." The forms of control mean nothing if there is no will to control, and if there is no will to control, then the form of it is more or less ir-relevant.

Such a will can only come

INVOLVED IN 1962 C.I.A. OPERATION: The S.S. Streatham Hill, a British freighter under Soviet lease, lying at anchor alongside two U.S. destroyers in San Juan, Puerto Rico, late in 1962. Her cargo of sugar was con-

taminated by C.I.A. agents when the ship put up for repairs en route from Cuba to the Soviet Union. The United Press International incident, designed by the intelligence agency to injure Cuban trade, instead incurret President Kennedy's wrath.

from the high political officials of the Administration, and it can best be inspired in them by the direct example of the Presi-dent. But even the President prob-ably could not impose his will on the agency in every case without the understanding, the concurrence and the vigorous and efficient cooperation of the second most important man in the matter of control-the di-rector of the C.I.A.
