

CIA Referrals to FBI of JFK assassination records, sent by FBI under date of 6/13/84,  
received 6/18/64

Described as Vol. II, captioned F.B.I. Reports, Lee Harvey Oswald Case, Reports #1  
through #65. Written on are DBB-8<sup>5</sup>626 20 Dec 63 and 201-289248. Stamped as  
CS copy.

"Index to Reports" says it is the inventory of what was delivered by S.J. Papiah,  
whose office is given as 1730 K St., NW. In fact that are three such indexes, of  
documents numbered through 187. In general, what is listed is letters and similar  
written material and some of LHO's<sup>B</sup> diary, what was written on Maasdam, etc.

The copies provided, however, are not the CIA's but are FBI file copies,  
at least in this volume. This eliminate any CIA notations or related memos. Doc #s, too.

The inventoried records do not appear to be new.

This version of Vol II bears not relationship to the inventory. The first  
record in it is from FBIHQ 105-118799 and relates to Manuel Riego Zuniga. This  
is followed by an FPCC Denver Division update, several, then the Dallas 2/28/64  
on Jeanne De Mohrenschildt, several reports, detailed and elaborate checking  
that also included George. Next Dall on Juan Francisco Quintana Maya, including  
the results of a mail check.<sup>a2</sup>

Nagell, Richard Case next. Appears to be El Paso's report from FBIHQ files,  
number unckear but possibly 64-48933. (With it as well as the others large numbers of  
pages are indicated as withheld on separate sheets.)

The rest is even less relevant. It is a miscellaneous and apparently unrelated  
series of records none of any substance or pertinence.

The covering FBI letter does not ask me to pay and there is no suggestion by  
the CIA that I should or must, even though it is refusing to respond to my inquiries  
about the status of its disclosures and my requests on the ground that I allegedly  
owe it money and that its regulations preclude responding under these alleged  
conditions.

Not large numbers. I misread the inserted sheets. The ~~large~~ large numbers  
are reference numbers.
