WHO SHOT JFK?

A Guide to the Major Conspiracy Theories

Bob Callahan

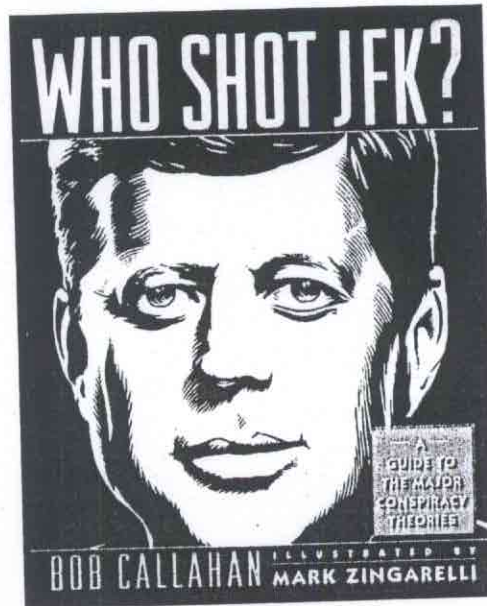

Illustrated by Mark Zingarelli

The single most compelling murder in modern American history took place on Elm Street in Dallas, Texas, on November 22, 1963. In the 30 years that have passed since the death of John Fitzgerald Kennedy, a staggering number of theories have been proposed, from the preposterous to the frighteningly plausible.

Here, gathered for the first time, are the assassination theories, with their evidence, and plausibility meticulously analyzed and presented in fascinating detail.

Who Shot JFK? is designed so the reader can question and understand the events and controversy surrounding the assassination, and sort through the contradictory theories. Based on information compiled by David Park and Peter Dale Scott, two of the foremost authorities on JFK conspiracy theories, the author examines the essential details and principal themes of more than 20 major theories, as well as the more comprehensive conspiracy theory overviews put forth in recent years, including Oliver Stone's film *JFK*.

Unlike any other on the market, this book critiques the critics, separates speculation from substantial evidence and hearsay from direct testimony, and allows readers the opportunity to form their own opinion of the fundamental questions: Was Oswald even the *real* killer? If he was, did he act alone? Whether you think so or not, *Who Shot JFK?* is the only book that provides all the information you need to decide.
