Harold Weisberg,
Route 8,
FREDERICK. Md. 21701
U.S.A.

Dear Harold,

I enclose a draft for US\$33.88, so that there need be no delay, if any of the books I need come to hand.

I particularly wish to sight a copy of the Naval Regulations governing an autopsy. I have written to the Naval Attache at the U.S. Embassy, but as yet without result -- but I have not given up hope. --- Needless to say I talked only ballyhoo! Wished to compare British and ~~UK~~ American practice, so some such bla!! ---- Your use of the Oswald autopsy was ingenious, and powerful, but it does not permit one deal strongly with the presence of so many extraneous bodies in the room! Manchester, who would hardly exaggerate if he knew what was involved --- an unlikely event!!! --- says ~~there~~ 34 persons present at one time!

I suspect that the curious route Main - Houston, -Elm and back of Main was expressly chosen to facilitate the assassination. If this be so, it would be of great interest, if one could show that the ~~XXXX~~ route originally planned never left Main --- and if one could also say on what date the route was changed. For that would give a key to the number of weeks that the assassination had been gestating! Any hopes of tracing this ?

I have now completed a draft of the five chapters, one on each of the five bullets!! But all the references at present copied have still to be checked with the Report itself.

Sincerely yours,

Chris Candler
