IN THIS TRADE PAPERBACK ORIGINAL, HAROLD WEISBERG,
THE FIRST TO CRITICIZE THE WARREN COMMISSION,
QUICKLY REFUTES POSNER'S VERSION

CASE OPEN The Unanswered Questions HAROLD WEISBERG

The case is not closed. Lee Harvey Oswald did not single-handedly, in league only with himself, murder the President of the United States, whatever Gerald Posner may assert in his recent volume on the assassination of JFK. Nor did the Warren Commission merely err in its investigation into the Kennedy assassination; the commission itself conspired to cover up facts and evidence crucial to the case. The involvement of the CIA and FBI is not merely speculative.

CASE OPEN offers a point-by-point refutation of Posner's book. Documented evidence shows that not only were the FBI and CIA linked to the Warren Commission cover-up but also Posner himself is now collaborating in the cover-up. He has attempted to close America's eyes to evidence that has been buried for three decades. Here's a book to open them.

HAROLD WEISBERG, a newspaper reporter and former Senate investigator, recently published *Selections from Whitewash*, in which he condenses his five volumes on the assassination of President Kennedy. He lives in Maryland.
